Acknowledgements

I would like to thank Ellen O'Neill, who motivated me to think about the possibility of writing a curriculum. I am so thankful to Claire Nissenbaum M.A. F/AOGP who encouraged me to take the ASDEC training and who continues to inspire my work. Thanks to the motivation given by my friend, Kathy Lanfear, who helped me start this project.

I also wish to thank my ASDEC colleagues who have helped me with the production of this manual: Traude Smith (CALT), Laurie Moloney (CALT). Thanks also to Rujuta Pandya and Patricia Craighill who created some of the pictures used for development of some of the learning modules in the book, and to Leah Moloney for help with the cover design.

I am so thankful to my parents, especially my dad who has been a constant source of encouragement to me. Last but not least, this book would not have been possible without the tremendous support and love of my husband Raju, and my children Nisha and Neal.

Introduction

The objective of K-Reading Kickstart program is to provide a strong foundation in reading, writing and comprehension to young learners, and moreover, identify learners with reading difficulties and other comprehension issues. K-Reading enhances reading skills by identifying different learning paths for groups with different learning abilities.

Phonological awareness is **the** key predictor of reading in young children. Research shows that concrete phonological skills develop strong reading skills. Phonological awareness is a broad term that incorporates several skills. It is the ability to hear and manipulate the sound structure within words, i.e., recognize that language is made up of words, syllables, rhymes, and sounds (phonemes). This knowledge occurs in oral language initially. It is a critical aspect of early literacy development and is linked to the attainment of reading, comprehension, and spelling. According to National Research Council (Snow, Burns, & Griffin, 1998) and National Reading Panel (NICHD, 2000) the critical components for teaching young children to read are:

- Phonemic awareness
- Phonics
- Vocabulary development
- Reading fluency, including oral reading skills
- Reading comprehension strategies

Multisensory approach involves the use of Visual (seeing), Auditory (hearing), Kinesthetic (movement), and Tactile (touching) (VAKT)

simultaneously to teach reading, writing, and spelling. All students benefit from this type of learning. Children process information differently and this method allows them to use a variety of their senses to understand and process information (Orton-Gillingham approach).

Multisensory Structured Language Education (MSLE) – also based on the work of Orton-Gillingham - teaches the structure of language by using multisensory method. The principles of MSLE program, as explained in the Multisensory Structured Language Teaching Fact Sheet from the International Dyslexia Association (IDA) are:

- Simultaneous, Multisensory (VAKT): Teaching uses all learning pathways in the brain (i.e., visual, auditory, kinesthetic- tactile) simultaneously or sequentially in order to enhance memory and learning.
- Systematic, Cumulative: the organization of material follows the logical order of the language. The sequence must begin with the easiest and most basic concepts and progress methodically to more difficult material. Each concept must also be based on those already learned. Concepts taught must be systematically reviewed to strengthen memory.
- Direct instruction: The inferential learning of any concept cannot be taken for granted. Multisensory language instruction requires direct teaching of all concepts with continuous student-teacher interaction.
- Diagnostic teaching: The teacher must be adept at prescriptive or individualized teaching. The teaching plan is based on careful and continuous assessment of individual needs. The content presented must be mastered step by step to the degree of automaticity.

- Synthetic and Analytic instruction: Synthetic instruction presents the parts of the language and then teaches how the parts work together to form a whole. Analytic instruction presents the whole and teaches how this can be broken down into its component parts.

Multisensory Structured Language Education (MSLE) and MS techniques typically used in a Montessori classroom, can work together to enhance beginning reading skills in preschool and kindergarten children. Since the Montessori method is systematic and multisensory, it blends well with MSLE to provide optimal results for early literacy development.

In a Montessori classroom, introduction to sandpaper letters is the first multisensory exercise in preparation for reading and writing. The purpose of these sandpaper letters is to learn the name, sound, and shape of the letters. It also helps to gain muscular memory of the shape of the letters as a precursor to writing. Tracing different geometric shapes, writing on chalk board, learning the different lines used in letters, are also taking place at this time getting the child ready for writing letters and words. Writing practice thus begins through tactile kinesthetic feedback from tracing shapes and sandpaper letters. Concurrently, there is also learning of the sounds associated with the letters and with time the identification of sounds in words also begins. Children move through writing to reading and begin to manipulate the letters to sound and spell word patterns beginning with closed syllables. As they practice word building, they begin to understand decoding skills. They also build words to represent pictures to attach a meaning to the word and this lays a foundation for comprehension. Automaticity in decoding develops with practice and they start to read words, sentences, small booklets.

The educational methodology and learning modules using such a blended approach for reading and literacy development among young learners is presented here as a one-year program.

K-Reading Kickstart is designed for kindergartners in a classroom setting, to be run by one teacher and one or more assistants. Assessment tools enable the teacher to group students according to reading ability. These tools also enable early identification of those students with more profound reading deficits who may require more specialized outside intervention.

K- Reading Kickstart also presents modules that address potential learning issues using a staggered approach enabling repetition of foundational aspects (re-teaching) by creating sub-groups.

The program works as follows:

- It is split into three “Phases” and each “Phase” runs for approximately 3 months,
- Reviews and assessments are conducted as follows:
 - Daily review at the end of each lesson
 - End of Phase review (after completion of each phase)
- Students are divided into groups at the end of each of the phase reviews
 - Decision is made on instruction level required for each group; a group that has not made enough progress will repeat lessons in specific areas, while continuing with new lessons
 - After the second Phase review (6 months), there may be 2-3 different groups in the class
- At the end of the program, 3 groups of students will be identified:
 - Students who can proceed to Grade 1 reading

- Students who need to attend a remedial Group Literacy program
- Students who may need a one-on-one therapy for reading e.g., Sounds in Syllables (SIS) therapy program

Figure 1 provides an overview of how the program works.

Figure 1: Overview of the program

This program offers a ‘prescriptive’ approach to reading and writing i.e., when a lesson is taught, the curriculum allows grouping of students according to their abilities and progress and provides time to repeat lessons as required. This helps student groups to move at a pace that is appropriate for them. For example, a student may require individual attention or additional group time to learn a concept. However, issues like dyslexia or dysgraphia may have to be addressed outside the program through specialized interventions.

1 Phonological Awareness

Phonological Awareness is one of the key predictors and a vital prerequisite for learning to read and spell. It is the ability to identify and manipulate units of sound.

The basic phonological awareness ability is detecting rhyme. The students with competent phonological awareness will easily recognize that the rime part is the same and only the onset is changed in words like pat, sat, and mat. The students with language learning disability often do not have this ability. Early intervention with exposure to rhymes is vital.

Phonological awareness involves the understanding that sentences are made up of words, that words are created from syllables, and syllables from sounds. When counting words, students with language learning disability may think that 'Atlantic' is three words, not being aware that the components are syllables that make up one word. This knowledge cannot be assumed to be in place, but it must be taught directly. Once the students are aware of the syllable components, they can learn to manipulate them, by adding, deleting, and reversing them. Only after extensive practice with syllables are the students able to identify and manipulate sounds in syllables. The awareness of phonemes (sounds) is the highest skill and requires daily practice. The students who can accurately detect and manipulate the sounds in a syllables are well equipped for reading and spelling activities.

Developmental learning modules pertaining to phonological awareness are described in the following pages under the following sections:

- Learning Sensorially
- Rhyming
- Words & Sentences
- Syllables
- Phonemic awareness

1.1 Learning Sensorially(LS)

Learning modules presented under this heading will help the student to learn through auditory, visual, and kinesthetic (tactile & movement) methods. They provide refining and sharpening their listening and visual skills; listening very attentively and actively; develop great attention span; learn to follow directions; and enhance vocabulary development. These skills will enhance the learning of phonological awareness which is one of the important predictors of future success in learning to read.

LS-1	The Silence Game	
	Materials:	A quiet classroom
	Aim:	To sharpen the students' listening skills Develop good attention span Auditory discrimination
	Presentation:	Tell the students that they are going to play a game called 'Silence Game'. Ask each of them to close their eyes and listen to the sounds in the room, outside the room and within themselves. Set a timer for 2 minutes. After 2 minutes of listening very quietly, ask them to share what they heard. They could have heard clock ticks, voices, footsteps, animals, children coughing, faucet, flush, cars, their own breathing, air conditioner, etc.
	Extension:	1. This game can be played in a different room or outdoors. 2. Use tape recordings of birds, or other animals and ask to guess the animal.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

LS-2	Guessing the Instrument	
	Materials:	A quiet classroom Musical instruments like rhythm sticks, drums, tambourine
	Aim:	Auditory sound discrimination Develop good attention span Vocabulary development
	Presentation:	Introduce the names of each instrument and show them what sounds they make. Have the names written on small cards beside each instrument. Ask students to close their eyes and listen to the sounds and guess the name of instrument that was played. Play each instrument in different sequences and ask them to guess the sequence.
	Extension:	Have three instruments. Ask the students to close their eyes and listen to the one sound you make. Ask one student to come and play the instrument you played. This game can be done with several other instruments or two sounds at a time and follow the same procedure as above.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

LS-3	Sequencing Sounds Game	
	Materials:	Objects that make distinctive sounds Examples: clapping, stomping, ringing a bell, paper to crumple, writing on board with chalk, cutting with scissors, chewing food noisily, opening the faucet, tearing paper, throwing a ball, coughing, sneezing
	Aim:	To develop sequencing memory for sounds and expressing them Auditory discrimination Vocabulary development
	Presentation:	Ask students to close their eyes. Teacher will make one sound at a time and ask the students to guess the sound. After the single sounds are heard, start with two sounds. Ask the students to identify the first sound and the next sound. When they can do this, present three sounds and then four sounds and see if the students can identify the sequence and the correct sound. Use the language first, second, third or last and use full sentences while responding.
	Extension:	Give three different sounds, ask the students to repeat the sequence. Now omit one sound and see if the student can identify the omitted sound. Ask students to make noises and ask their friends to guess.
	Summary:	Note how students are doing with the sequencing and the use of words first, second, third, last, etc. and take notes for future repetitions of this lesson as necessary.
	Notes	

LS-4	Guess the Direction	
	Materials:	Students making different sounds Musical instruments
	Aim:	To successfully locate the direction where the sound is coming from Auditory discrimination Vocabulary development
	Presentation:	Before starting this lesson, teach the students the four directions: north, south, east, west and place cards with names in each direction. Pick a student to be the 'maker' of the sound. All the other students close their eyes. The 'maker' goes to a different part of the room and makes a clapping sound. The students will guess where the sound is coming from. He must name the direction: n, s, e, w. The student who guessed will get to be the 'maker' of the new sound. This student can make any other sound from a different part of the room. The students will guess where the sound is coming from.
	Extension:	Students can use musical instruments to repeat the same game.
	Summary:	Note if the students can recognize the direction of the sound and take note for future repetitions of this lesson as necessary.
	Notes	

LS-5	Guessing the Sounds	
	Materials:	Basket with whistle, rattle, bell, paper, rhythm sticks, sandpaper pieces and blocks
	Aim:	To guess which object makes the sound Auditory discrimination Vocabulary development
	Presentation:	First introduce the names of all the objects and make the sounds of each object. Choose a student to go behind a screen and make the sound by using one of the objects while all the other students have their eyes closed. The students will guess which object made the sound. Give a chance to every student. This can be done in two groups.
	Extension:	Have small food jars each filled with rice, pennies, beans, sand, tacks, and paper clips. Cover the jars with paper so that the students cannot see the objects in the jars. Each student can shake the jar and guess what the sound is.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

LS-6	Play the Exact Number	
	Materials:	Rhythm sticks
	Aim:	Listening attentively to the number of sounds made Auditory and kinesthetic discrimination
	Presentation:	Bring the rhythm sticks in a basket. Demonstrate how to use rhythm sticks. Distribute the rhythm sticks to all the children. Now choose a child to be the 'player' and ask him/her to choose two rhythm sticks and play it 5 times. The students in the circle will have to play 5 times exactly as they heard. Choose different students to do the same but they can choose the number of times to play.
	Extension:	Use the same instruments but ask the player to go to a corner of the room and play the instrument. The children in the circle will guess where the sound is coming from. Let them use the correct terminologies, like the north corner, south corner, etc. Ask a student to sit in the center of the circle. Blindfold the student. Now pick another student from the circle and ask him to move to a different part of the room and say, 'hello or good morning.' The blindfolded student will have to guess where the sound is coming from.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.

LS-7	Simon Says Game	
	Materials:	None
	Aim:	To follow directions Auditory and kinesthetic discrimination
	Presentation:	Play Simon Says starting with very simple to more complex directions.
	Extension:	Have a student give the directions and ask the other students to follow.
	Summary:	Note how many students follow directions appropriately.
	Notes	

LS-8	Telephone Game	
	Materials:	None
	Aim:	Auditory memory recall Learn 'left and right'
	Presentation:	Have the students sit in a circle. Whisper into the first student's ear a simple phrase or a sentence, like, 'Today is a cloudy day.' This child will whisper this sentence to the next student either to the left or right. The last child will tell the class what he hears.
	Extension:	Repeat the same game with two sentences and play it to the right or left. This also helps them to learn left and right.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

LS-9	Clapping Game	
	Materials:	None
	Aim:	Auditory memory Auditory and kinesthetic discrimination
	Presentation:	Students sit in a circle. Pick a leader and ask him/her to clap a rhythm. The students in the circle will have to produce the same rhythm. Give a turn to several students to produce their own rhythm. Ex. Clap, clap, clap Clap, pause, clap, pause Clap, stomp, clap, stomp Stomp, clap, clap, clap Stomp, stomp, clap, clapso on This game can also be played using rhythm sticks.
	Extension:	Another game is to tell the students that: One clap means stand on their knees; two claps mean jumping twice; three claps mean turning around three times. Students take turns giving commands.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

LS-10	Name That Object	
	Materials:	10 little objects in a basket
	Aim:	Auditory memory Auditory, visual, kinesthetic discrimination Vocabulary development
	Presentation:	Students sit in a circle. Have one student come and pull out three objects from the basket while naming each object. The student then places these three objects away from the other students' sight. This student will call on a student who must name the three objects pulled. If he answers correctly, he gets to pull out three more objects from the basket. This game will continue till the children can name the objects correctly and in the same order.
	Extension:	Increase the number of objects to be pulled out of the basket. This can be done using pictures instead of objects.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

LS-11	Matching Game	
	Materials:	Numbers 1,2,3,4 written on small square paper
	Aim:	Auditory memory; following directions; visual & kinesthetic discrimination
	Presentation:	Prerequisite for this work requires the students to know their numbers 1-4. Students sit in a circle. Teacher gives numbers 1,2,3,4 to each student. Teach the numbers if they haven't still learned. Continue in this fashion until all the students get a number 1,2,3, or 4. The teacher calls on number 2 to jump up. All the students with no. 2 will jump up. Then the teacher calls on another number. The students with that number will stand up. This is a great auditory memory exercise. It also makes them do different movements and learn their numbers.
	Extension:	Do the same type of game with colors, animal names or fruits or vegetables. These can be given to students, and they must stand up when their respective color, name is called. This can be played with any color song.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

LS - 12	Choo Choo Cha Song	
	Materials:	None
	Aim:	Auditory memory Following directions Kinesthetic, auditory, visual discrimination Vocabulary development
	Presentation:	Students stand in a circle. Depending on the unit being studied this song can be adapted with the appropriate words. (chorus) I'm singing in the rain Just singing in the rain What a glorious feeling I'm happy again Just singing and dancing in the rain (chorus) 1. Thumbs up (kids repeat) A choo choo cha, a choo choo cha, A choo choo cha cha Chorus 2. Thumbs up 3. Elbows in 4. Knees bent 5. Bottom out 6. Head back 7. Tongues out Repeat 2,3 – a choo choo cha.....chorus Repeat 2,3,4 – a choo choo cha.....chorus Repeat till the end
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

LS - 13	Tooty Ta Song by Kiboomers	
	Materials:	None
	Aim:	Auditory memory Following directions Kinesthetic, auditory, visual discrimination Vocabulary development
	Presentation:	Students stand in a circle. (chorus) A tooty ta, a tooty ta, a tooty ta ta 1.Thumbs up (kids repeat) A tooty ta, a tooty ta, a tooty ta ta 2. Elbows back 3. Feet apart 4. Knees together 5. Bottoms up 6. Tongue out 7. Eyes shut 8. Turn around Repeat 1,2 – a tooty ta.....chorus Repeat 1,2,3 –chorus Repeat till the end
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary
	Notes	

1.2 Rhyming (RMG)

Rhyming words have the same ending sounds. A rhyme can occur in songs or poems. Rhyming may be easy for some children but not all. Sensitivity to Rhyming is a vital part of the development of phonemic awareness as you need to listen for the sounds inside words. Students who can hear rhymes can recognize the ‘onset and rime.’ ‘Onset’ is the sound/sounds that come before the vowel and ‘Rime’ is the string of letters that follow, usually a vowel and final consonants. E.g., in the word, ‘cat’ - ‘c’ is the onset and ‘at’ is the rime. A rhyming word will have different onsets and the same rime. Students who are not familiar with rhymes practice this repeatedly to become better.

Learning modules presented under this heading will help the student to learn rhyming through auditory, visual, and kinesthetic methods, and enhance vocabulary development.

RMG - 1	Same and Different	
	Materials:	*3 circle, 1-triangle cards
	Aim:	Visual, auditory, kinesthetic discrimination Vocabulary development
	Presentation:	This should be done in smaller groups. Have the 2 circle cards on the table or on board. Ask each student to trace the circle. Their hands go around both times. Tell them that therefore these two are the same. Now ask the students to trace the circle and then the triangle. Is it the same? No, they are not the same. They are different. Now place both circle, circle and circle, triangle cards on the table. Ask the student to show the 'same cards,' then the 'different cards.' Point out to the 'same or different cards' and ask them, 'what is this?' The answer will be 'same or different.' This is called a 'three period lesson.'
	Extension:	Make 2 copies of different shapes like hearts, diamonds, squares, rectangles. Mix the shapes into same and different cards. For example, have heart and heart; diamond and square; rectangle and rectangle spread on the table. Show the students the 'same and different' cards. Students can tell you if they are 'same' or 'different.'
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See picture titled - **RMG-1**

RMG - 2	Listen to Same and Different	
	Materials:	Same and different cards
	Aim:	Auditory, kinesthetic, visual discrimination; vocabulary development
	Presentation:	Show the students 'same' and 'different' cards. Ask them to point to the 'same and different' cards. Now ask the students to make same or different sounds like 'clap, clap' or 'clap, snap' or 'clap, snap, clap, etc.' If the sounds are the same, point to the 'same' card or give thumbs up; and if they are different, point to the 'different' card or thumbs down. Few sounds could be: Clap, clap Snap, clap Clap, snap; clap Clap, clap; clap
	Extension:	Ask students to turn to close their eyes. The teacher makes similar sounds as above and the students say 'same' or 'different' instead of pointing out to the cards.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

RMG - 3	Same Ending Sounds	
	Materials:	Maracas; rhythm sticks; tambourine; drums; cymbals or 4-5 different musical instruments
	Aim:	To recognize that the ending sounds for rhymes are same and only the beginning sound changes Reinforce the listening skills Vocabulary development
	Presentation:	Teacher produces a pair of sounds with the instruments. First: maracas and the cymbals Second: rhythm sticks and cymbals Third: drums and cymbals Now ask the students what was the instrument that they heard in all the three different sounds. Where did you hear the cymbals – beginning or end? This shows that the ending sounds are the same in rhyming.
	Extension:	Use different mediums of sounds to show them that the ending sounds are the same in rhyming words.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

RMG - 4	Visual Awareness of Rhyming	
	Materials:	5-6 Red, 1 blue, 1 green, 1 yellow, 1 brown, 1 orange square construction paper/ sticky note pieces that can be placed on a board
	Aim:	To show visually that rhyming changes only in the initial position Auditory, kinesthetic discrimination
	Presentation:	This module can be useful for students who have difficulty with rhyming. Place the 5 red construction paper squares on the board one below the other. Tell the students that these squares are 'at'. Now place the blue, green, brown, white, and yellow square pieces to the left of the red squares. Teacher: Where do they look the same? At the end. Teacher: Where do they look different? At the beginning. Teacher: Rhyming words sound the same at the end and different at the beginning. The red squares are 'at'. Point and ask the students to repeat each red square. Point to each different color and running the finger from left to right teacher says: M-at, c-at, r-at, s-at, b-at. Show them that only the initial sound changes. On the second day, ask the students to generate the words.
	Extension:	This same activity can be done with different color paper or tiles or cubes.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes:	

RMG - 5	Rhyming Words	
	Materials:	Story books/nursery rhymes
	Aim:	Develop the phonological cues to make rhymes Auditory discrimination Vocabulary development
	Presentation:	The teacher gives two rhyming words and students echo them. Continue this exercise for a few days. When the students are familiar with rhyming, the teacher gives 2 rhyming words and students can echo and generate 2 more rhyming words. For example, Teacher: pig, jig Student: pig, jig, rig, dig This can be done with movement or passing a ball to each other.
	Extension:	Rhyming can be done with action. Teacher: Echo the words 'cat, mat, sat, bat.' Let us act out these words. Teacher acts out and students repeat. Cat – snap and clap Mat- tap and clap Sat – jump and clap Bat – skip and clap What action was the same in all these words? Yes, it was 'clap' at the end . Where was it different? Yes, at the beginning . Rhyming words end the same and are different in the beginning.
	Summary:	Note how students are doing and take notes.

* See examples of Nursery Rhymes on next page-**RMG-5**

List of Nursery Rhymes – (RMG-5)

Twinkle, Twinkle, Little Star
Hickory Dickory Dock
One Two, Buckle My Shoe
Peas Porridge Hot
Jack Be Nimble, Jack Be Quick
Hey Diddle Diddle
Humpty Dumpty
The Muffin Man
Itsy Bitsy Spider
Mary Had A Little Lamb
The Wheels On The Bus
Frere Jacques
Baa Baa Black Sheep
I'm A Little Teapot
Jack and Jill

RMG - 6	Stories with Rhymes	
	Materials:	*Books with rhymes See next page for list of books
	Aim:	To train the student's ears to listen and predict rhyming words
	Presentation:	First time, read a story normally to the students with all the rhyming words. Stop after each rhyming word and repeat the rhyming words. Second time, read the same story and exaggerate the rhyming words. Next, read the first line with the rhyming word and let the students provide the rhyming word in the second line. Finally, read the same book and omit the final rhyming words in both first and second lines. Ask the students to guess the words. Students love listening to the same stories repeatedly.
	Extension:	Start off with simple books with stories.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples of Books that rhyme on next page-**RMG-6**

Books with Rhymes – (RMG-6)

One fish, two fish, red fish, blue fish by Dr. Seuss
Fox in socks by Dr. Seuss
Green eggs and ham by Dr. Seuss
Goodnight Moon by Brown, M.W.
All About Arthur by Carle, E.
Jamerry by Degen, B.
Where's my teddy? by Alborough, J.
Henny Penny by Galdone, P.
Is your mama a llama? by Guarino, D.
Chicka chicka boom boom by Martin, B.
Polar bear, polar bear, what do you hear? by Martin, B.
Ten cats have hats by Marzollo, J.
Here are my hands by Marin B., Archambault J., Rand T.
Giraffes can't dance by Giles Andrease
Llama Llama red pajamas by Anna Dewdney
My truck is stuck by Kevin Lewis
Each peach pear plum by Allan Ahlberg

RMG - 7	Odd One Out	
	Materials:	*Printed words to read
	Aim:	Increasing the phonological cues to generate rhymes Auditory discrimination
	Presentation:	The teacher says three words. Students echo the words. Say that only two words rhyme, and one does not. Ask them to tell you which word does not rhyme.
	Extension:	Extend this to four and five letter words.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page-**RMG-7**

Odd One Out (RMG - 7)

Cat, rat, leg

Mat, pig, fat

Car, bat, hat

Dog, fat, log

Sat, mop, mat

Bed, log, led

Nap, map, nit

Sun, mud, fun

Bug, rug, rat

Bit, bat, sit

RMG - 8	Pick the Rhymes	
	Materials:	Pictures with rhymes* (RMG -8) Scissors, glue
	Aim:	To build the visual cues for generating rhymes Visual, auditory discrimination Vocabulary development
	Presentation:	Give pictures to the students. Ask them to cut out only the ones that rhyme. They glue the rhyming pictures on plain paper. They read them to the class.
	Extension:	Give more pictures to the students, two that rhyme and one that doesn't rhyme. Ask them to look at the pictures and they will give you the correct rhymes.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See picture titled - **RMG-8**

RMG - 9	Rhyme Time	
	Materials:	9-square template and rhyme pictures * (RMG-9)
	Aim:	Visual identification of rhymes Kinesthetic, auditory discrimination
	Presentation:	This is done in smaller groups. Give 9-square templates to each student. Teacher places one picture on top of each square. Spread out six pictures that rhyme with each of the pictures on the square. Students pick the appropriate pictures that rhyme with the picture on the square. They glue two rhyming pictures to each of the squares. Each group of students can read their rhymes to the group or class.
	Extension:	More rhyming discrimination can be done with several other pictures.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See pictures and 9-square template titled - **RMG-9**

RMG - 10	Rhyme Hunting	
	Materials:	None
	Aim:	Working on the Phonological cues for rhyming Kinesthetic, visual, auditory discrimination
	Presentation:	Teacher: Today we are going on a rhyme hunt in the classroom. I see a 'pear.' What other words rhyme with 'pear?' Students guess 'chair, hair, etc.' Continue with other words. Choose any object in the room, ask to come up with rhyming words. E.g., I see a 'pen' and the students will come up with 'ten' or 'men' etc. 'I see a block! What do you see in the classroom that rhymes with block?' – sock, clock. Continue with more words.
	Extension:	Give a chance to a student to come up with a word and let the others find rhyming words to that word. Rhyme hunting can be done on trips to a farm; camping; or vacations.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

RMG - 11	Rhyme or Not	
	Materials:	*Pairs of words with some that rhyme and some that do not
	Aim:	Auditory discrimination
	Presentation:	Dictate a pair of words to the students. Students echo the words and tell if they rhyme or not.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – **RMG-11**

Rhyme or Not? (RMG -11)

cat/hat

fox/box

pig/bag

top/lip

stop/pop

show/snow

bed/red

rest/best

mad/sid

lad/lass

get/bet

cap/pup

rip/sip

back/boss

kid/sid

ten/top

night/day

day/pay

box/sox

fun/run

rug/bug

mud/mut

RMG - 12	What rhymes with ---	
	Materials:	*Words to rhyme
	Aim:	To be able to generate rhyming words Auditory discrimination Vocabulary development
	Presentation:	Teacher dictates a word to the students. Students echo the word and either in a group or individually name a word that rhymes with the given word. See below for the words.
	Extension:	Students can act out verbs and rhyme. For e.g., clapping/slapping; seeding/weeding/; feeding/reading; feeling/peeling; tanning/fanning; etc. This can be done for color words as in: Red/bed; blue/clue; yellow/mellow; brown/frown; gray/pray; green/screen; White/might; black/slack; etc. Also, can use number words as in: One/fun; two/moo; three/free; four/pour; Five/dive; six/fix; seven/eleven; eight/weight; nine/fine; ten/men; etc.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – **RMG-12**

What rhymes with.....(RMG - 12)

cat	cake	ball	make	tip	rain
bug	top	hot	down	big	map
dog	bag	coat	save	day	leg
leg	feet	round	Pin	tip	rain
pan	hill	hair	hand	red	fun
late	Go	get	light	dress	cold
dish	tree	jump	nail	book	seat
bet	cry	sick	sun	hug	back
car	mud	me	up	at	row

RMG - 13		Go Fish
	Materials:	Deck of rhyming picture cards * (RMG-13)
	Aim:	To recognize rhyming words
	Presentation:	Shuffle the cards and deal 5 cards to each player. Place the rest of the cards face down in the pile. The first student says, 'I have a bug'. The student with the rhyming card says, 'I have a mug'. These cards are put in a pile in the center. If there is no match available, the student must go fish a card out of the pile until a match is made. Whoever runs out of cards first is the winner.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See picture titled - **RMG-13**

RMG - 14		Rhyme Your Name
	Materials:	None
	Aim:	Auditory discrimination
	Presentation:	Teacher: Today we are going to rhyme your name. The teacher can start off with her name and make a rhyme. Then each student can stand up and take a turn to rhyme their name.
	Extension:	Now this time, the other students can come up with rhyming names for their friends. Rhyme pet names.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

RMG - 15	Rhyming Memory Game	
	Materials:	Rhyming pictures– use the same cards as (RMG-13)
	Aim:	Visual discrimination
	Presentation:	Copy the pictures on cardstock and cut out each of the pictures. Two to four children can play this game. Place all the cards facedown. The first player turns over two cards at a time. If the pictures on the two cards rhyme, the player keeps the cards and takes another turn. If the pictures on the two cards do not rhyme, the player places the cards facedown, and the next player takes a turn.
	Extension:	Play the same game with other rhyming words.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* Same as picture titled - **RMG-13**

RMG - 16	Rhyming Sentences	
	Materials:	*Rhyming sentences, number, and color rhymes (RMG 16a, b, c)
	Aim:	Auditory discrimination Improving the phonological cues to generate rhymes
	Presentation:	The teacher reads each sentence and pauses at the slash. Students complete the rhyme by giving an appropriate rhyming word.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – **RMG-16a, 16b, 16c**

Rhyming Sentences (RMG – 16a)

I see a **jug**/ on top of the _____. (**rug**)

The little **lad**/ plays with the _____. (**pad**)

The two men **talk**/ while they _____. (**walk**)

There is a **boy**/ who plays with his _____. (**toy**)

A big brown **bat**/ flew over my _____. (**hat**)

My dad found the **rake**/ and saw a big rattle _____. (**snake**)

Her mom can **bake**/ a very delicious _____. (**cake**)

I sat in my **car**/and saw in sky, a beautiful _____. (**star**)

The man and the **pig**/ can do a little _____. (**jig**)

His dad called him **Tony**/because he could ride a _____. (**pony**)

Why do you **moan**/instead of picking up the _____? (**phone**)

The flower is **pink**/ and it sits in a vase over the _____. (**sink**)

I had no **clue**/ that the sky can be so _____. (**blue**)

RMG – 16b

Color a Rhyme: Give each student nine squares; the student colors each square with the rhyming color.

1. My mom got me a **bed**
And I like it because it is _____. (red)
2. The circus has a **clown**
Whose arm is painted in _____. (brown)
3. The teacher has no **clue**
Why the sky is so _____. (blue)
4. The man wore his tie so **tight**
That his face got, oh so _____. (white)
5. He got a lot of **flak**
For not writing it in _____. (black)
6. They all call him a great **fellow**
He always shows up wearing _____. (yellow)
7. My porch has a **screen**
That is painted white and _____. (green)
8. My brother says **borange**
When he means _____. (orange)
9. The juice fell off the **tray**
And stained the rug dark _____. (gray)

RMG – 16c

Write a Rhyme: Students may sky write the numbers that rhyme:

1. Have a lot of **fun**
But make it number _____. (1)
2. My friend said '**boo**'
And so, did I to make it _____. (2)
3. Tomorrow I am **free**
To meet you at _____. (3)
4. My feet are so **sore**
Because I stayed up until _____. (4)
5. It was a big **dive**
For a boy who is only _____. (5)
6. He helped his mom **mix**
The eggs of which there were _____. (6)
7. How many angels in **heaven**
Maybe there are _____. (7)
8. My mom closes the **gate**
When the clock strikes _____. (8)
9. You have to draw the **line**
When it comes to number _____. (9)
10. Be ready with your **pen**
When the teacher says _____. (10)

RMG-17	Guess the Onset	
	Materials:	*List of words
	Aim:	To recognize sounds within a syllable Indirect preparation for reading
	Presentation:	For the teacher: An Onset is all the sounds in a word that come before the first vowel sound. T: I am going to give you a few words. Listen and echo each word. Then tell me what sound you hear that is the same in all these words before the vowel. T: Echo, sill, sip, sing, sand, sack S: Echo the words. T: what is the same sound that you hear in these words before the vowel? S: /s/ T: Give more words for students to practice the initial sound called ' Onsets. ' This can be done with pictures or objects.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page – **RMG-17**

RMG - 18		Rhyme family Game
	Materials:	Ball or bean bag or anything to throw to each student
	Aim:	Automaticity of rhyme production Auditory, kinesthetic discrimination Vocabulary development
	Presentation:	The students sit in a circle. Review the rhyme families to be played today. To begin the game, the teacher says, "My house is filled with mats. " Toss the ball to any student in the circle. This student must produce a rhyme (e.g. "my house is filled with cats") and throw the ball back to the teacher. The teacher repeats the original rhyme and then tosses it to another student. This continues until the students run out of rhymes. Then begin the game with a new object in the house. See example below. *
	Extension:	The children can throw the ball to each other and choose a new word to rhyme when they run out of rhymes. They can rhyme things in a farm, school, camp or any a special trip.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

*My house is filled with chairs. (bears, stairs, mares, hares; pears, etc.)
 My house is filled with jars. (stars, bars, mars, cars, scars, etc.)
 My house is filled with tins. (pins, fins, bins, dins, skins, shins, etc.)
 My house is filled with rugs. (bugs, dugs, hugs, mugs, pugs, slugs, etc.)

1.3 Words & Sentences(WS)

Words can be divided into syllables. Words can be long or short. Long words will have more letters than short words. Sentences are made of words – this concept forms the basis of the introduction to the structure of our language.

Learning modules in this section deal with the understanding of the structure and meaning of sentences & words; introduction to comprehension which will be very essential in reading and writing.

WS-1	Word Length	
	Materials:	*Word pairs
	Aim:	To recognize long and short words Auditorily and visually Vocabulary development
	Presentation:	In this exercise, we will concentrate on the concept of a word as separate from the thing that the word describes. Teacher says, 'I will say two words. You echo the words and tell me which word is longer.' Truck or grasshopper? Students echo the words. Students may tell the teacher 'truck' from the size it resembles. To show them visually, draw a line for each letter of the word or use small square pieces of paper. Place 5 lines for truck. Place 11 lines for grasshopper. Now ask them which is longer. Tell them that the word with more letters is also longer. See next page for word pairs.
	Extension:	These words can be written on the board or printed on a paper in bold. They can be printed side to side or above and below, so the students can see the length.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page

List of Word Pairs (WS – 1)

Bus – Monkey

Pizza – Hamburger

Chair – mosquito

Car – beetle

Boy – candy

bear – library

home – elephant

butterfly – grasshopper

Bee – dragonfly

Earth – Watermelon

WS-2	Word Length	
	Materials:	*Word pair cards
	Aim:	Auditory development of long and short words Development of vocabulary
	Presentation:	This game is very similar to the above game but without the use of visual aids. Teacher first reads the words from the cards. The students echo the words. Ask the students to tell which word is longer. Show long and short by arm motions. For the students having difficulty, practice lesson WS -1.
	Extension:	Revisit this lesson after the introduction of syllables. They can clap the syllables or use body movements and verify by looking at the cards to see if they were correct.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page

List of Words (WS -2)

Cow – ladybug

Ant – brontosaurus

Bus – motorcycle

Dog – giraffe

Mosquito – truck

Tree – flower

Bee – butterfly

Elephant – cat

Beaver – pig

Goat – lizard

WS-3	Two in One	
	Materials:	*List of Compound Words
	Aim:	To recognize that two words can be put together to make a new word Vocabulary development Auditory discrimination
	Presentation:	Teacher says the words: baseball, basketball, softball. Besides being different kinds of balls, what do these words have in common? These are ' compound words '... i.e. made of two small words that are combined to form a new word, with its own meaning. Compound means 'putting together.' For example, take the words 'cup' and 'cake.' If we put these two together, we get the compound word 'cupcake.' Let us think of other delicious compound words. How about 'black berry, straw ... berry?' This can be done with hand motion. Teacher pulls out fist for the first word and another fist for the second word and combine them to form the compound word. The students repeat the same.
	Extension:	Have puzzle cards of compound words to put together.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes:	

* See examples on next page

List of Compound Words (WS - 3)

(Putting together words)

Cup	cake
Pop	corn
Oat	meal
Water	melon
Grape	fruit
Pea	nut
Break	fast
Apple	sauce
Blue	berry
Black	berry
Bubble	gum
Cheese	burger
Corn	bread
Flap	jacks
Fruit	cake
Ginger	bread
Corn	meal
Butter	milk
Bean	sprout
Cheese	cake
Ham	burger
Meat	ball
Meat	loaf
Pine	apple

WS-4	Pull Them Apart	
	Materials:	*List of Compound words Pictures of words is optional
	Aim:	Identifying the two words in a compound word Kinesthetic, visual, auditory discrimination
	Presentation:	Teacher dictates a compound word. Ask the students to listen to the two words inside that word. Students echo the word slowly. The students then name the two new words inside the compound word. Students can have the two fists together and then pull each fist apart as they say each word.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page

Pull Them Apart (WS - 4)

Paintbrush	Seashore	Homework	Suntan
Bookcase	Baseball	Playground	Haircut
Backpack	Seesaw	Classroom	Raindrop
Flashlight	Fireman	Cowboy	Kneecap
Eyebrow	Eyelash	Mailman	Doughnut
Milkshake	Eyeglasses	Cheesecake	Sunflower

WS-5	Add a Word	
	Materials:	*List of Compound words Optional - felts
	Aim:	Making compound words.
	Presentation:	Teacher dictates the first part of a compound word. Ask the students to echo and give you the last part. They make a new compound word. Multiple answers are correct. Use of fists or felts make it more fun.
	Extension:	Have some mixed words or pictures that the students can glue together to make compound words.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page

Add A Word (WS-5)

(Some ideas)

Eye glasses/lashes

Cow boy/girl

Foot path/ball

Black bird/berry

Sun flower/shine

Moon light/shine

Basket ball/maker

Cross walk/talk

Fire works/men

Foot print/stool

Tooth brush/paste

Ice cube/cream

WS-6	Deletion of Words	
	Materials:	*List of Compound words Pictures of the first part of the compound word (optional)
	Aim:	To increase awareness of two words within a compound word.
	Presentation:	The teacher gives the word, 'raincoat.' The students echo the word. She then asks the students to say it without 'coat.' Students say 'rain.' Can have a picture of rain. Do more examples as given below.
	Extension:	Do the same exercise with compound words from stories being read in class.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes:	

* See examples on next page

List of Compound Words (WS – 6)

Paintbrush	(without brush)
Baseball	(without ball)
Seesaw	(without see)
Classroom	(without room)
Seashore	(without shore)
Bookcase	(without case)
Milkshake	(without shake)
Backpack	(without back)
Playground	(without ground)
Homework	(without work)
Suntan	(without sun)
Sunflower	(without flower)
Moonlight	(without light)
Haircut	(without hair)
Raindrop	(without rain)
Eyebrow	(without brow)
Eyelash	(without eye)
Mailman	(without mail)
Flashlight	(without light)
Fireman	(without man)
Strawberry	(without berry)
Doughnut	(without nut)
Cupcake	(without cake)

WS-7	Words in a Sentence	
	Materials:	7-8 Small cubes; * list of sentences
	Aim:	To recognize how many words are in a sentence.
	Presentation:	Give the small cubes (about 7-8) to each student. Each cube represents a word. These are placed in a straight line in front of the student. Teacher dictates a sentence. <i>E.g. I have a blue car.</i> Students echo the sentence. As the students repeats the sentence, they move a cube down as they say each word. Students then count the number of cubes and tell the number of words in a sentence.
	Extension:	Show pictures to students and ask them to generate full sentences. Do the same as above with the cubes. The teacher gives the sentences as the students place the cubes for each word. Now the teacher places the printed words on the board. The students can then check to see if they are correct.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page

List of Sentences (WS – 7)

Mark jumps. (2)

Janet cries. (2)

The dogs bark. (3)

The car is blue. (4)

Some birds fly. (3)

The bell rang. (3)

A frog hops. (3)

The boat sailed away. (4)

The boys will sing the song. (6)

The girls and boys ran a race. (7)

Our class played ball. (4)

We want candies. (3)

The farmer fed the chickens. (5)

WS -8	Long or Short Sentence?	
	Materials:	*List of long and short sentences Cubes
	Aim:	Reinforces the idea that a sentence is made up of different number of words.
	Presentation:	Teacher distributes 7-8 cubes to students. She starts producing barebone sentences, that is, sentences made of only two monosyllabic words. Students echo and tell how many words are in the sentence. Teacher can write and box each word for the students to see them. After a few 2- word sentences, start giving them 3 words, 4 words, (monosyllabic) and so on. Now give them two different sentences with different number of words. T: If the sentence has only 4 words, it is a short sentence. If there are more than 4 words, it is a long sentence. S: will count the number of words in each sentence and tell whether it is long or short.
	Extension:	Place word cards on board for the visual reinforcement of this concept. This is a good time to show that words have space between them in a sentence. Also show them how placing the words in a different order can change the meaning.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page

List of Short and Long Sentences (WS – 8)

A cow moos. (3)

The mom hums a tune for her son. (8)

The girl ran. (3)

We will see bears at the zoo. (7)

The frogs hop.(3)

Bat and cat rhyme. (4)

The bell rang. (3)

Big birds build big nests. (5)

The boy swam. (3)

I went to check on the hens. (7)

Ann fell. (2)

A big bug sat on a rose. (7)

Mike was mad.(3)

The bee stung the little lad. (6)

Frogs hop in the rain. (5)

The cat chased the little mouse. (6)

She fed the pigs. (4)

The slug is very slow. (5)

The clock tells time. (4)

My dad took me to see movies (7)

WS - 9	Sentence Bingo	
	Materials:	*List of short and long sentences **Bingo 1 and Bingo 2 cards Dry-erase markers List of sentences; optional cubes
	Aim:	To reinforce the number of words in a sentence
	Presentation:	This can be played with all students. Divide the students into two groups. There are two different sets of bingo cards – Bingo card 1 and Bingo card 2. Give one type of bingo card to students in one group and the other type to students in the other group. Teacher reads a sentence (<i>e.g. The girl can sing</i>). Students echo the sentence. They can either use cubes or their body part to count the words. Students raise their hands and call out the number of words in the sentence. When the correct answer is called out, students mark the space with that number on their card. e.g., If there are '5' words in the sentence, the students will mark the number '5' on the bingo card. Whoever gets a vertical or horizontal or diagonal or four squares, will shout BINGO.
	Extension:	This can be done with pictures where the students make the sentences, and the others mark their cards.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page

** See Bingo Cards titled “WS-9”

List of Sentences for Bingo(WS - 9)

Sarah jogged. (2)

I had a slice of peach pie. (7)

Molly caught a bass. (4)

Aunt Mary coughed. (3)

In the morning the birds sang sweetly. (7)

Dan screamed. (2)

The kids were at the lake until sunset. (8)

My dog ran away yesterday. (5)

Max will be early. (4)

Can a pig chase a dog? (6)

Sing more loudly and clearly. (5)

The Dill family traveled to Texas. (6)

The cherry cobbler was delicious. (5)

I have a hermit crab. (5)

Swimming in the ocean makes me happy. (7)

Before they hiked in the woods, they ate. (8)

Will Dina arrive early? (4)

At night the stars shone brightly. (6)

The tall gorilla pounded his chest. (6)

A big fish appeared. (4)

The baby smiled. (3)

Will the tadpole turn into a frog? (6)

A small brown snake slithered under the fence. (8)

The white tiger roared loudly. (5)

The bobcat hissed. (3)

WS - 10	Word Rows	
	Materials:	*List of short and long sentences; students
	Aim:	To reinforce the number of words in a sentence; to show how reorder of words can change the meaning.
	Presentation:	Teacher reads a sentence. E.g., 'The girl can sing.' Students echo the sentence. Choose 4 students to represent 4 words of the sentence. The students stand from left to right. The teacher touches the head of each student as she says the sentence. Students echo their words. Ask the fourth student to sit. Now the teacher touches the head of the students who are standing up, and they say the sentence (The girl can). Next the third student sits down, and the students do the same as above (The girl). This goes on till no one is left. Do this activity with different lengths of sentences. Teacher can also ask the students to sit out of order and see if the students can recall the words.
	Extension:	Students can sit on a chair in a line for the number of words in a sentence. Move out chairs in between and see if the students can say the sentence without that word.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page – **WS-10**

List of Short and Long Sentences (WS – 10)

The squirrel ran. (3)

There were three cows in the farm. (7)

The man drove very fast. (5)

I like the blue car. (5)

It is very cold outside. (5)

Can you see the sun go down? (7)

My mom baked very delicious pies. (6)

A big boy ate an apple. (6)

My dad took me to the circus. (7)

I ride the school bus daily. (6)

1.4 Syllables (SYL)

Syllables are units of oral or written language with one vowel sound and some accompanying consonants. They are units of sound said with one push of a breath. It is important to learn syllables in order to decode and encode. There are six types of syllables; only closed syllables are addressed here.

Learning modules in this section will help the students to learn:

- Divide words into syllables
- Syllable counting
- Syllable blending
- Syllable segmentation
- Syllable deletion
- Syllable reversal
- Syllable substitution

SYL - 1	What is a Syllable?	
	Materials:	*List of words with different number of syllables
	Aim:	To teach what a syllable is and how the words are made of smaller units of speech Auditory, kinesthetic discrimination
	Presentation:	Teacher asks the students to echo the word, 'Da/vid' and the students echo it. Teacher asks the students, 'how many times did my jaw open when I said the word 'David?' Yes, two times. A syllable is a word or a part of a word. It contains a single vowel accompanied by consonants. Words may have one, two, three or more syllables. Our jaw opens and closes for each syllable in a word. Ask them to place a hand below the chin and see how many times the jaw touches the hand. Each time the jaw touches the hand, it is counted as a syllable. Tell them that each syllable relates to the opening and closing of the jaw.
	Extension:	Use more words that the children are familiar with.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See example on next page – SYL-1

SYL - 2	Counting Syllables	
	Materials:	*List of words with varying syllables Rectangular shaped foam pieces to represent syllables
	Aim:	Auditory, Kinesthetic, Visual reinforcement of concept of syllables Vocabulary development
	Presentation:	Teacher says the word 'car.' Ask the student to look at your jaw to see how many times the jaw opens and shuts. Yes, one. Reinforce definition of syllable. A syllable is a word or part of a word. Give each student 4-5 rectangular foams of the same color. Each foam represents a syllable. Give the students the words listed below. Ask them to pull one foam for each syllable. Demonstrate this before expecting the students to show you. Another way to do this is with movement . First syllable - tap their head Second syllables – touch their neck Third syllables – touch their shoulders Fourth syllables – touch their tummy Fifth syllables – touch their knees Sixth syllables – touch their ankles
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See example on next page – Syl-2

List of Syllables (SYL-1)

Alejandro	Erin	book

SYL-3	Clapping Names	
	Materials:	List of names of students in class The rectangular foams (optional)
	Aim:	Visual, Auditory, kinesthetic reinforcement of Syllable
	Presentation:	Teacher says that some of the students have short names, and some have long names. Say some of their first names. Now the teacher chooses a student's name and says it while clapping it out. e.g. Li/nus; Ed/na; Jack; etc. After each name has been clapped, ask the students how many syllables they heard. Once they become comfortable with this, ask them to clap the syllables in their own name . They may use the felts which represent each syllable.
	Extension:	1. Do the same activity with the students' last names. 2. Ask the students to sit in a circle. Point to a student. Ask the students to: clap their hands or whisper or silently find the number of syllables in the name of the student who has been picked. 3. Have the students say their names and stand in groups according to the number of syllables in their names. Now write their names on a card and write the nos. 1-5 on cards. Challenge the students to sort their names according to the number of syllables.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

SYL-4	Objects in a Basket	
	Materials:	A basket with several objects; examples of objects that may be used: Pen, pencil, eraser, crayon, marker, book, cube, marble, small ball, ruler, paper, small box, etc. Rectangular foams are optional.
	Aim:	Visual, Auditory, Kinesthetic reinforcement of Syllables Vocabulary development
	Presentation:	Invite a student to close his/her eyes and pick an object from the basket and name it. E.g., this is a 'crayon.' Other students repeat the name as they clap out the syllables. Then ask the students how many syllables they heard. Each student then takes turns to find an object, say the name, and clap the syllables.
	Extension:	1. Do the same activity with the objects in the classroom. 2. This activity can be done with things in a park. 3. Continue the same activity with things in the home. Instead of clapping, they can do different physical movements.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

SYL-5	Syllable Sorting with Pictures	
	Materials:	* Pictures with different number of syllables A pocket chart (optional) Rectangular foams (optional)
	Aim:	Visual. kinesthetic reinforcement of Syllables Vocabulary development
	Presentation:	Place the numeral cards 1-4 in the top row of a pocket chart. Have students each select a picture card, say its name, and then clap and count the number of syllables. For students who need more reinforcement, use the foams. Students then place the card in the pocket chart below the corresponding number of syllables. Review the pictures in each column after the pictures have been sorted.
	Extension:	1. Pictures of the unit or theme being learned in the class can be used. 2. When the students are comfortable, give them any picture card, and challenge them to sort it without saying the name or clapping. This may be challenging for some as the kinesthetic aspect is removed.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See picture titled “SYL-5”

SYL-6	Syllable Bingo	
	Materials:	*Bingo card (SYL-6) **Words (See next pg.) Markers or pencils
	Aim:	Visual and auditory reinforcement of counting syllables in words
	Presentation:	This can be played with all students. Divide the students into two groups. There are two different sets of bingo cards. Give one type of bingo card to students in one group and the other type to students in the other group. Teacher calls out words. Students raise their hands and call out the number of syllables in the word. When the correct answer is called out, students mark the space with that number on their card. e.g., If the word is 'car' the students will mark the number one on the bingo card. Whoever gets a vertical or horizontal or diagonal or four squares, will shout BINGO.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes:	

* See Bingo card titled 'SYL-6'

** See words for Bingo on next page

SYL-7	Syllable Graphing	
	Materials:	Graphing paper reproducible (SYL-7) Syllable pictures; scissors, glue stick
	Aim:	Visual/kinesthetic reinforcement of Syllables
	Presentation:	Each student can do this activity. Students place the graph paper on a flat surface. Teacher distributes syllable pictures to each student. Student picks a picture and places it in the column on the graph with the same number as the number of syllables in the word. Have the students repeat this process until all the syllable cards have been placed. Ask the students questions about the graph. How many syllables do most of the words have? How many 2 syllable words do we have? etc.
	Extension:	1.Students can play the card game 'War' with the syllable cards. 2.They can play 'Go Fish' with the syllable cards. 3.A game of 'Concentration' can also be played with these cards.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

*See Graphing paper and pictures titled “**SYL- 7**”

SYL-8	Syllable Tower	
	Materials:	Unifix cubes Syllable picture cards with varying number of syllables
	Aim:	Visual, auditory, kinesthetic reinforcement of Syllables
	Presentation:	Place the syllable cards in a paper bag. Ask a student to draw the first card and keep drawing until he can find the card with one syllable. When he finds one syllable card, he will place it on the table with one cube above it. Continue the same procedure giving turn to each student until 2,3,4 syllable cards have been found. Students place the cubes above the syllable cards. Now the students pick cards from the bag and place them under the appropriate syllable tower until all the cards are done. This can be done with movement by jumping/skipping once for one syllable, twice for two syllables, etc.
	Extension:	1.The above can be played as a game with two or more students. Have the cards placed face down on the table. Players take turns drawing cards in sequence and building their own tower.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

SYL-9	Syllable Blending	
	Materials:	* List of two syllable words Rectangular foams / hands
	Aim:	To show how to blend syllables one by one into familiar words Preparation for reading, writing
	Presentation:	Teacher can say that she is going to say words in a different way today. The students must guess the right word. Teacher says ' <i>pic</i> ' and shows her left hand and now says ' <i>nic</i> ' and shows the right hand . Now ask the students, 'what word is this?' She brings the hands together saying '<i>pic/nic</i>.' Students echo the same. Teacher continues to give two-word syllables distinctly for the students to blend and find the new syllable.
	Extension:	1.Can extend this activity to showing pictures of words. 2.Teacher gives the whole syllable, and the students pull them apart.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page **Syl-9**

List of Syllables (SYL-9)

Ap/ple	num/ber	Cor/ner
Emp/ty	trum/pet	tur/tle
Mar/ker	sil/ver	Spar/kle
Nap/kin	cop/per	but/ter
Blis/ter	ba/by	wat/er
Gar/bage	grand/ma	pa/per
Pub/lic	hun/gry	pen/cil
Pic/ture	muf/fin	but/ter
Sum/mer	o/cean	fid/dle
Can/dle	ta/ble	lad/der
Mar/ble	den/tist	am/ber
Sham/poo	law/yer	pen/cil
Cam/el	tea/cher	ro/bot
Ea/gle	roos/ter	bas/ket
Tem/per	plas/tic	rab/bit

SYL-10	Syllable Recall	
	Materials:	Numeral cards with 1, 2, 3, 4, 5, 6 or dice
	Aim:	Recall of Syllables Preparation for reading, writing
	Presentation:	This is a very abstract exercise and may be challenging for some students. Teacher asks a student to pick a number. If dice is used, students roll the dice and decide the number. The student produces a word with that many numbers of syllables. For simplicity, you can have a category like states, countries, objects, restaurant, etc. If this is very challenging, start off with one or two syllables and fold in more as the students get proficient at it. Vary the lesson with different movements for different number of syllables.
	Extension:	The variation can be to show pictures. The student picks a number from the dice or paper. The student will point to the picture with the same number of syllables. For e.g., if he picks 3, he will show the picture of an elephant.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

SYL-11	Syllable Bingo with Pictures	
	Materials:	*Bingo card (SYL-6) Pictures (SYL-5 or SYL-7) Dry erase markers
	Aim:	Recall of Syllables Preparation for reading, writing
	Presentation:	Students can be divided into smaller groups for this game. Place pictures from any of the syllable activities face down. Distribute a marker to each student. The first student picks a picture and names it. If it has 2 syllables, they both place their cross with the marker on the '2' on their bingo card. Students take turns choosing the picture. The game continues until someone fills in either a row or a column. That student says BINGO.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See Bingo card titled 'SYL-6' & pictures titled 'SYL-7 or SYL-5'

SYL-12	Syllable Accents	
	Materials:	List of syllables or pictures
	Aim:	Learning how to accent a syllable To help in preparation for reading, writing
	Presentation:	Review alphabet accenting lesson, AL-20. T: Names a few students' names, overemphasizing the accented syllables in their names. E.g. Sta' cy; Ka' ra; Ja' son; A'dam Ask if they heard a difference in the way one part of the name was said. We said some parts louder than the others. When one part is accented, the mouth opens wider and hence said louder and the tone is higher. The accented part can be modeled with hands up in the air and down for unaccented syllable. The students can look in the mirror to see the accents in their names. Practice with all the students' names by accenting the syllable.
	Extension:	Practice words with accent in the second syllable in two syllable words; and multisyllabic words
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

SYL-13	Syllable Deletion – I (last syllable)	
	Materials:	*List of names of people Rectangular Foams
	Aim:	To encourage awareness of syllables within words Preparation for reading, writing
	Presentation:	It is best to use the names of the students in the class for this exercise. On the second day, the given list can be used. Teacher says a name, Johnny. Then she says <i>Johnny</i> without 'nee' – which will be ' <i>john</i> .' T: Say Johnny and put out the rectangles for each syllable. S: Say Johnny and put out 2 rectangles. T: Now say Johnny without 'nee'. S: Take out the second rectangle and say 'John'. T: will continue with other names. Use the foam rectangle pieces only if needed. This can also be done with hand movements. Put one hand out for each syllable. When the syllable is deleted, take that hand off.
	Extension:	1.Do the above with different names or names of students in class. 2.Teacher can say the name, leave out a syllable and ask the student which syllable she left out.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page

List of Names (SYL-13)

(Delete the last syllable)

Say <i>Bobbie</i> ;	Say it again, but don't say <i>bee</i>	<i>Bob</i>
<i>Russell</i>	<i>sell</i>	<i>Rus</i>
<i>Kendra</i>	<i>druh</i>	<i>Ken</i>
<i>Baxter</i>	<i>ter</i>	<i>Bax</i>
<i>Hadley</i>	<i>lee</i>	<i>Had</i>
<i>Esther</i>	<i>tur</i>	<i>Es</i>
<i>Velma</i>	<i>muh</i>	<i>Vel</i>
<i>Mona</i>	<i>nuh</i>	<i>Mo</i>
<i>Henry</i>	<i>ree</i>	<i>Hen</i>
<i>Ellen</i>	<i>len</i>	<i>El</i>
<i>Bella</i>	<i>luh</i>	<i>Bell</i>
<i>Colby</i>	<i>bee</i>	<i>Coal</i>
<i>Linden</i>	<i>den</i>	<i>Lin</i>
<i>Dustin</i>	<i>tin</i>	<i>Dus</i>

SYL-14	Syllable Deletion - II (first syllable)	
	Materials:	*List of names of people; foams
	Aim:	To encourage awareness of syllables within words; preparation for reading and writing
	Presentation:	This can be done with rectangular foams or hand/head movements. Teacher says a name, <i>Johnny</i> . Then she says Johnny without ' <i>john</i> ' – which is ' <i>ny</i> ' Teacher gives several names to the students and asks them to say the names without the first syllable.
	Extension:	1.Can extend this activity to multi syllabic words. 2.Do the above with different names or names of students in class. 3.Teacher can say the name, leave out a syllable and ask the student which syllable she left out.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page

List of Names (SYL-14)

(Delete the first syllable)

Say	<i>Nan/cy</i>	Say it again, but don't say	<i>Nan</i>	<i>cee</i>
	<i>Bray/den</i>		<i>Bray</i>	<i>den</i>
	<i>Bro/dy</i>		<i>Bro</i>	<i>dee</i>
	<i>Grif/fin</i>		<i>Grif</i>	<i>fin</i>
	<i>Ca/leb</i>		<i>Cay</i>	<i>leb</i>
	<i>Co/dy</i>		<i>Co</i>	<i>dee</i>
	<i>Con/nor</i>		<i>Con</i>	<i>ner</i>
	<i>Dan/ny</i>		<i>Dan</i>	<i>nee</i>
	<i>Da/vid</i>		<i>Day</i>	<i>vid</i>
	<i>Dev/in</i>		<i>Dev</i>	<i>in</i>
	<i>En/zo</i>		<i>En</i>	<i>zoe</i>
	<i>E/than</i>		<i>E</i>	<i>than</i>
	<i>Ev/an</i>		<i>Ev</i>	<i>un</i>
	<i>Gav/in</i>		<i>Gav</i>	<i>in</i>

SYL-15	Syllable Substitution	
	Materials:	* List of Syllables 3 Foam pieces cut into rectangular shapes
	Aim:	Learning to substitute syllables Auditory discrimination
	Presentation:	Students will enjoy this activity if their names are used and one of their syll. is substituted. Use foams or hand/head movements. Teacher gives a syllable and a new syllable to substitute the last syllable. Students find the new word. Say 'MaryAnn.' Students echo <i>MaryAnn</i> and pull out three foam pieces down. Take the syllable 'Ann' out. Take out one foam representing 'Ann.' What is left? Point to the two foams and say 'Mary.' Now add 'Beth' to 'Mary.' Add another foam to represent 'Beth.' Say the new syllable.... 'Marybeth.'
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page

List of Syllables (SYL-15)

Say	Cowboy	without	boy	add	girl	new word	cowgirl
	Jason		son		cub		Jacob
	Friday		fri		sun		Sunday
	Tickle		tic		pic		pickle
	Sandwich		witch		castle		sandcastle
	Dishpan		pan		washer		dishwasher
	Market		mark		buck		bucket
	Homework		work		home		homesick
	Needlework		needle		paper		paperwork
	Nightgown		gown		mare		nightmare
	Boldness		bold		cute		cuteness
	Middle		mid		fid		fiddle
	Keypad		pad		hole		keyhole
	Moonlit		lit		less		moonless
	Party		tee		lor		parlor
	Sister		sis		lit		litter
	Baby		bee		sin		basin

SYL-16	Playing with Syllables	
	Materials:	*List of detached syllables
	Aim:	Learning to add to a detached syllable and reverse the new syllable Preparation for reading, writing
	Presentation:	Use movements with hand or head or use rectangular foams. Teacher asks the students to echo the word <i>corn</i> . Add <i>pop</i> to the end of corn.... <i>cornpop</i> Switch the parts and say the new word... <i>popcorn</i> . Repeat with all the given words.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page

List of Detached Syllables (SYL-16)

echo the syll. *school*,
add *pre* to the end of *school* (schoolpre)
switch the syllables (preschool)

echo the syll. *man*,
add *mail* to the end of *man* (manmail)
switch the syllables (mailman)

echo the syll. *boy*,
add *cow* to the end of *boy* (boycow)
switch the syllables (cowboy)

echo the syll. *go*,
add *car* to the end of *go* (gocar)
switch the syllables (cargo)

echo the syll. *tic*,
add *plas* to the end of *tic* (ticplas)
switch the syllables (plastic)

echo the syll. *real*,
add *un* to the end of *real* (realun)
switch the syllables (unreal)

SYL-17	Syllable Order	
	Materials:	*List of syllables
	Aim:	To focus on syllables and learn to manipulate their order Auditory reinforcement
	Presentation:	Teacher asks the students to listen to the syllables. They are not in the right order. <i>e.g., nus/Li is Li/nus</i> Tell the students to listen to these syllables and unscramble them to make the correct name. Once the students show proficiency, give them multisyllabic words.
	Extension:	1.After the students are comfortable, use their names in the classroom.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page

List of Names (SYL-17)

lix/fee	Felix

See/nan	Nancy
Sun/jay	Jayson
Lee/bil	Billie
Seph/Jo	Joseph
Ter/Wal	Walter
Vin/Gal	Galvin

1.5 Phonemic Awareness

Phonemic Awareness is the most complex skill of all the Phonological Awareness activities. It is important to be able to hear and manipulate the oral sound patterns before identifying these patterns in print.

Phonemic awareness deals with the sounds i.e., phonemes. A phoneme is the smallest unit of sound. Phonemic Awareness is the ability to hear, identify and manipulate individual phonemes in spoken words. It directs the attention to the arrangement of the sounds instead of the meaning of the spoken words.

The activities involving phonemic awareness are **aural** and no print is involved. '**Aural**' relates to the ear or sense of hearing. 'Oral' refers to speaking. Phonemic awareness instruction is sequential.

Developmental learning modules pertaining to phonemic awareness covering Phoneme isolation, Phoneme blending, Phoneme segmenting, Phoneme deletion, Phoneme substitution and Phoneme manipulation are grouped under the following sections:

- Initial Sounds
- Final Sounds
- Medial Sounds
- Combining Sounds

1.5a Initial Sounds (IS)

The Learning modules in this section help the students to:

Isolate initial, middle, and final phonemes - finding individual sound in words e.g. the initial sound in cat is /c/; middle sound in man is /a/; final sound in pop is /p/

Identify phonemes in words: finding the same sound in cat, can, and cab - /c/

Blending of phonemes to form words: forming a word by listening to sequence of phonemes e.g. /c/ /a/ /b/ is cab

Segmenting of words: break apart a word into separate sounds – pan is /p/ /a/ /n/

Deletion: changing of initial, middle, or final phoneme in words

Substitution: substitute initial/middle/final phoneme with a different phoneme

IS-1	Sound Pictures	
	Materials:	Mirror; pictures of lips, tongue, teeth (optional)
	Aim:	To show visually how sounds feel in one's mouth to help with phoneme articulation
	Presentation:	The use of mirror is engaging but also this is how your brain recognizes those sounds. Auditory features and gestures are part of identification. Louisa Moats called this 'Mouth awareness.' Teacher gives each student a mirror. Direct the students to place the mirror on their desks and lift it only when they are asked to make a sound. // refers to sounds; ___ refers to names Mirrors up, echo the sound /m/ while you look in the mirror. Are your lips together? Yes/no responses. Can you see your lips together? Mirrors up and echo the sound /s/ as you look in the mirror. Are your teeth together? Can you see your teeth together? Do the same as above with the sound /a/ and ask the children: Is your mouth open? Can you see your mouth open?
	Extension:	Continue to review the above concepts for a few days until the students are very familiar with it. As an option, pictures of lips closed, teeth together and mouth open can be used to reinforce this concept.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes:	

IS-2	Same or Different Shapes? - Review	
	Materials:	*Same (2 circles) Different (circle, triangle) cards (RMG-1)
	Aim:	To teach 'same' and 'different' visually
	Presentation:	This module has already been done earlier in rhyming. It is repeated here for reinforcement. Place the 'same' card (two circles) on the board or table. Point to the two circles and say – circle, circle. The students can trace the circles in the air while saying it. They are the same. Teacher places the 'different' cards on the board/table. The students trace the circle, triangle in the air while saying - 'circle, triangle.' They are different. The teacher asks the students to point to the same card. The teacher asks the students to point to the different cards. The teacher shows the same and different cards and asks the students, 'what is this?' The students respond, same, different. Continue this exercise until the students can identify these 'same and different' cards well.
	Extension:	Repeat with different shapes (provided) if the students need more practice. Can use same and different objects or counters or pictures.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See picture titled – **RMG-1**

IS-3	Same or Different Sound Shapes?	
	Materials:	**Same and different cards (RMG 1,2) *Examples
	Aim:	To show visually how sounds feel in one's mouth to help with phoneme articulation
	Presentation:	Review the same and different cards before this activity and place them on the board. Teacher: Watch my mouth as I say some sounds. If my mouth looks the same, say ' same ' while pointing to the 'same' card. If my mouth looks different, point to the 'different' card, and say ' different. ' Use sounds given below.
	Extension:	Do the same as above. The teacher can give a turn to each student to echo the sounds while looking in the mirror and ask other students to say whether it is same or different.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page

** See picture titled "RMG-1,2"

IS-4	Discovery of Consonants	
	Materials:	Mirror
	Aim:	To show visually how sounds feel in one's mouth to help with phoneme articulation
	Presentation:	The teacher reviews the 'lips closed, open, tongue and teeth' concept. I am going to say a sound; you will echo the sound and look at your mouth in the mirror and tell me how your mouth feels. Now, mirrors up. Say /t/ sound. Students echo looking in the mirror. T: What part of your mouth is used to make the sound. The tip of your tongue and teeth. The air flow is blocked by the tongue and teeth. /t/ is a blocked sound. A blocked sound is called a Consonant. Do this with several Consonant sounds. When they understand this concept, introduce the voiced/unvoiced concept. T. asks them to put their hands on their throat. T. Echo the /t/. Do you feel any buzzing or vibration. No buzzing or vibration, hence the sound is unvoiced. If there is vibration, the sound is voiced. Let us try this with other sounds.
	Extension:	The teacher gives turn to the students to echo the sounds while looking in the mirror. The other students say whether it is blocked or unblocked, voiced or unvoiced.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson
	Notes:	

IS-5	Discovery of Vowels	
	Materials:	Mirror
	Aim:	To show visually how sounds feel in one's mouth to help with phoneme articulation
	Presentation:	The teacher reviews the 'lips closed, open, tongue and teeth' concept. Listen and echo the sound; look at your mouth in the mirror and say how your mouth feels. Now, mirrors up. Teacher: Say /a/- (closed vowel sound – like in the beginning of 'apple.') Students echo it while looking in the mirror. T: Is your mouth open or closed? S: Mouth is open. T: Is the air flow blocked by the tongue, teeth, or lips? S: It is not blocked by anything. So, it is an unblocked sound. An unblocked sound is a Vowel. Do this with all the vowel sounds. T: Place your hands on your throat. She asks the students if it is buzzing or vibrating. Yes, it is buzzing. So, it is a voiced sound. Try it with all vowels. They will discover that all vowels are voiced and unblocked.
	Extension:	The teacher gives turn to the students to echo the sounds while looking in the mirror. The other students say whether it is blocked or unblocked, voiced or unvoiced.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

IS-6	Pulling Down Sounds	
	Materials:	*Card with three squares (IS-6) 3 Counters (counters represent sounds) ** List of sounds
	Aim:	Auditory discrimination of the beginning sounds and to master left to right sequencing Preparation for reading, writing
	Presentation:	Give 3 counters to each student and ask them to place them on their desk. Teacher: Listen and echo the sounds and move one counter for each sound starting from the square with the star. Start with single sounds and slowly add more sounds. Teacher says /m/ Student echoes /m/ and then pulls down one counter as he makes the sound /m/. He places it on the left most side of the square (square with star). After a few single sounds, say /t/, /a/ First teacher says /t/. Next the teacher says /a/ and the student echoes /a/ and pulls down and places one more counter to the right of /t/, as he makes the sound /a/. Continue the same activity with 2,3, or 4 sounds.
	Extension:	Can do this activity with more sounds.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See template titled “IS-6”

IS-7	Name Game	
	Materials:	Names of students in the classroom
	Aim:	Isolation of phonemes in their names
	Presentation:	The teacher chooses one of the names of the students in the classroom. She must enunciate the initial sound very distinctly. Teacher says, 'I am going to say the beginning sound of one of your names.' Teacher says /n/ Whose name begins with /n/? Students may come up with two or three names that begin with that sound. Encourage the students to guess all the possible names beginning with that sound in the class. Introduce synonyms for 'beginning'. Say that 'Initial' and 'first' mean the same as beginning. Play this game with different initial sounding names.
	Extension:	Sing with the student's names isolating the initial sound to the tune of 'If you are happy and you know it clap your hands.' If your name begins with /s/ stand up If your name begins with /s/ stand up If your name begins with /s/ Stand up and take a bow If your name begins with /s/ stand up... Sarah, Sandy, etc. Students can be given turns to say the initial sound and other students will guess the name.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

IS-8	Sorting Objects/Pictures	
	Materials:	* Pictures beginning with the same initial sound (IS-8)
	Aim:	Auditory discrimination of the initial sounds; preparation for reading
	Presentation:	This is an activity to be done with smaller groups of students. Teacher picks three pictures beginning with the same sound. She picks one picture and emphasize the initial sound, e.g., /m-m-m/ <i>for mitten</i>. The students take turns doing the same with the remaining two pictures. When the students feel comfortable, add three pictures of another sound beginning with another sound, each time asking the students to identify the name and initial sounds. Repeat, but this time mix pictures with different initial sounds. Introduce only single consonant sounds at a time.
	Extension:	Do the same activity with objects in the room. Point to an object in the room and ask the student to give the initial sound of that object.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See picture titled - **IS-8**

IS-9	Guessing Game	
	Materials:	Objects in the environment; Bag of objects/pictures beginning with different sounds (IS-8 pictures)
	Aim:	Reinforcement of initial sounds
	Presentation:	Teacher says, 'we are going to play a guessing game.' You must guess the name of the object after I give you some clues. T: says, 'I am thinking of an object that begins with the sound /t/ The students echo the sound /t/ Say, 'this object is a piece of furniture. It is made of wood or metal. You need to use it to eat your dinner. Mostly it is found in the dining room or kitchen or sometimes it may be found outside. What object is it?' A table. You can Continue with several objects from the environment; a farm; classroom; home, etc.
	Extension:	1.Do the above game with objects in a box. Teacher can line up the object and follow the above presentation. 2.This can also be done with pictures displayed on the board; or objects in the school or home. Reuse IS-8 pictures.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

IS-10	Initial Sound Game of Names	
	Materials:	*Names of students
	Aim:	Learn to identify the initial sound of the names in class Auditory reinforcement of sounds
	Presentation:	(Research has shown that using the students' names is more effective than arbitrary names.) Teacher: 'I am going to say one of your names without the initial sound. You must guess the initial sound.' T: <i>Eel for Neal; Ran for Fran</i> , etc. Students will guess <i>Neal and Fran</i> . Continue with several other names in class. Extend this to the people in their homes or some new names as given in the list below.
	Extension:	This time the teacher can give the full names and say it without the initial sound. The students can guess the sound that is missing. E.g. Say Neal; now say eel; what sound is missing? Yes, the initial sound is n-n-n-n-n. Give several examples this way.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page - IS-10

Ike for Mike

Ex for Rex

Iley Miley

Eth Beth

Achel Rachel

Ico Nico

Arry Barry

Rank Frank

Lex Alex

Odd Rod

In Fin

Rew Drew

Ed Ned

Live Olive

Ary Mary

Liver Oliver

IS-11	Deleting Initial Sounds	
	Materials:	*Names of people or any objects
	Aim:	To identify the missing initial sounds
	Presentation:	Teacher says a name and then says it without the initial sound. Students guess. Teacher: Say <i>Helen</i> without the /h/.... <i>Elen</i> Say <i>Barry</i> without the /b/..... <i>Arry</i> Continue with other names.
	Extension:	This game can be done with names of people, objects, countries, pets, etc.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – IS-11

List of names and objects (IS-11)

Matthew without /m/ will be *atthew*

Steve /s/ *teve*

John /j/ *on*

Kathy /k/ *athy*

Laura /l/ *aura*

Monica /m/ *onica*

Denis /d/ *enis*

Pam /p/ *am*

Design /d/ *sign*

Jump /j/ *ump*

Cake /c/ *ake*

IS-12	Changing Initial Sounds	
	Materials:	*Names of people or pictures of people
	Aim:	To focus on initial sounds and be able to manipulate it.
	Presentation:	Teacher asks the students to echo the name Page. Students echo <i>Page</i>. Now she asks them to change /p/ in <i>Page</i> to /s/ Students will replace /p/ with /s/ in <i>Page</i>. Yes, it will be <i>Sage</i>. Work with several names in this way. Some children may have problems with this. Break it down more. Say Page. Say Page without /p//age/ Now add /s/ to /age//sage/ Different faces of people cut out from magazines, or newspapers can be used.
	Extension:	This exercise can be done with names of objects; names of countries; names of pets, etc.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes:	

* See examples on next page – IS-12

List of people names (IS-12)

Say <i>Harry</i> ,	now change	/h/ in <i>Harry</i>	to	/l/(<i>Larry</i>)
<i>Larry</i>	/l/	<i>Larry</i>	/b/	(<i>Barry</i>)
<i>John</i>	/j/	<i>John</i>	/d/	(<i>Don</i>)
<i>Hal</i>	/h/	<i>Hal</i>	/s/	(<i>Sal</i>)
<i>Laura</i>	/l/	<i>Laura</i>	/m/	(<i>Maura</i>)
<i>Gail</i>	/g/	<i>Gail</i>	/l/	(<i>Lail</i>)
<i>Jerry</i>	/j/	<i>Jerry</i>	/b/	(<i>Berry</i>)
<i>Jordan</i>	/j/	<i>Jordan</i>	/g/	(<i>Gordon</i>)
<i>Page</i>	/p/	<i>Page</i>	/s/	(<i>Sage</i>)
<i>Felix</i>	/f/	<i>Felix</i>	/h/	(<i>Helix</i>)
<i>Carla</i>	/c/	<i>Carla</i>	/m/	(<i>Marla</i>)

IS-13	Identify Initial Sounds	
	Materials:	*Sheet with words
	Aim:	Auditory reinforcement of initial sounds
	Presentation:	Teacher dictates a word, dog. Students echo - dog. Teacher: what is the first/initial sound that you heard? Students: /d/ Continue with many different words with single initial consonants. Do not introduce words with blends or digraphs during this time.
	Extension:	Do the same work with the unit being studied that month; or words that belong to parts of a house.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – IS-13

List of words (IS-13)

<i>Hand</i>	<i>/h/</i>	<i>Mary</i>	<i>/m/</i>
<i>Feet</i>	<i>/f/</i>	<i>paper</i>	<i>/p/</i>
<i>Mouth</i>	<i>/m/</i>	<i>coin</i>	<i>/c/</i>
<i>Elbow</i>	<i>/e/</i>	<i>axe</i>	<i>/a/</i>
<i>Toe</i>	<i>/t/</i>	<i>barn</i>	<i>/b/</i>
<i>Fingers</i>	<i>/f/</i>	<i>yarn</i>	<i>/y/</i>
<i>Nose</i>	<i>/n/</i>	<i>wagon</i>	<i>/w/</i>
<i>Lips</i>	<i>/l/</i>	<i>under</i>	<i>/u/</i>
<i>Face</i>	<i>/f/</i>	<i>up</i>	<i>/u/</i>
<i>Hair</i>	<i>/h/</i>	<i>snake</i>	<i>/s/</i>
<i>Head</i>	<i>/h/</i>	<i>insect</i>	<i>/i/</i>
<i>Tummy</i>	<i>/t/</i>	<i>gold</i>	<i>/g/</i>
<i>Nails</i>	<i>/n/</i>	<i>orange</i>	<i>/o/</i>
<i>Wrist</i>	<i>/r/</i>	<i>rainbow</i>	<i>/r/</i>

IS-14	Sound Pictures	
	Materials:	*Several pictures cvc words (IS-8) Card with three squares One counter
	Aim:	To isolate initial sounds Visual reinforcement of words starting from left to right Preparation for reading, writing
	Presentation:	Teacher gives a bag of pictures to each student. Students take turns to pull out a picture and place it above the square. Students will say the name of the picture and the initial sound of the picture. They will pull out one counter and place it in the left square. This will help them to see that words go from left to right.
	Extension:	This can be done with words given by the teacher orally; this can be done with 2,3, or 4 letter words.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* Use same pictures as **IS-8**

IS-15	'Take Away' Game	
	Materials:	*List of words
	Aim:	To separate the initial sounds of words and form a new word without the initial sound.
	Presentation:	Teacher will say that today we are going to play a game called 'Take Away'. The teacher will say the word, 'fan' and Students echo the word. Now the teacher asks the students to take away the initial sound /f/ and say the new word left. Students will say 'an' which is a different word. Continue with the list of words in the same fashion.
	Extension:	Ask the students to guess their friend's name when the teacher says it without their initial sound. e.g., Barry without /b/---arry Teacher can also take away /at/ of /cat/ and ask the students what she took away. Continue with other words.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page

List of words (IS-15)

<i>Cat</i>	<i>without</i>	<i>c</i>	<i>is</i>	<i>at</i>
<i>Hat</i>		<i>h</i>		<i>at</i>
<i>Ham</i>		<i>h</i>		<i>am</i>
<i>Bit</i>		<i>b</i>		<i>it</i>
<i>Bin</i>		<i>b</i>		<i>in</i>
<i>Box</i>		<i>b</i>		<i>ox</i>
<i>Pail</i>		<i>p</i>		<i>ail</i>
<i>Dale</i>		<i>d</i>		<i>ale</i>
<i>Bend</i>		<i>b</i>		<i>end</i>
<i>Meat</i>		<i>m</i>		<i>eat</i>
<i>Neat</i>		<i>n</i>		<i>eat</i>
<i>Deal</i>		<i>d</i>		<i>eel</i>
<i>Rash</i>		<i>r</i>		<i>ash</i>

IS-16	Odd Man Out	
	Materials:	*List of words with sets of two/three same initial sounds and one with a different initial sound
	Aim:	To reinforce the understanding of initial phonemes
	Presentation:	Here the students pick out the word that doesn't begin with the same sound. Teacher will say four words. Students echo them. Teacher asks them to take out the word that begins with a different initial sound. Teacher: '<i>cat, cap, cad, map</i>' Students echo these. Now teacher asks them to pick out the word with a different beginning sound '<i>map</i>'. Continue with the words on the next page. (Some students may have retrieval issues. Give only 3 words at a time to these students.)
	Extension:	This exercise can be done with names of students, pets, or objects in class.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – IS-16

List of words (IS-16)

pig, pin, *Jill*, pit

met, meg, *bet*, men

dot, *not*, doll, dog

gas, gap, gal, *map*

Hal, had, hid, *bed*

sun, sum, sub, *luck*

dab, dam, dig, *hid*

fun, fad, fid, *tip*

tee, tip, *rap*, tag

fin, fish, fit, *will*

bin, bill, bid, *tat*

sit, sun, *run*, sin

bag, *sag*, bat, ban

IS-17	Scavenger Hunt	
	Materials:	Several assorted objects/pictures taken from magazines or from the collections provided in this book A small paper bag.
	Aim:	To reinforce the understanding of initial phonemes
	Presentation:	Have the students in groups of 3 or 4 depending on the class size. Each group gets a bag with a picture or an object in it. Teacher needs to make sure that the students know the name of the picture/object and its beginning sound. For ex. if it is a picture of an 'alligator, the student will say 'alligator - /a/'. Each group then goes around the class and looks for items that begin with that same initial sound /a/ that is in their bag. When the group has found about 3-4 objects, they bring it to their tables. When the whole class is done, each group can share their findings.
	Extension:	T. will give an initial sound to a student. The student will bring students whose name begins with that initial sound.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson,
	Notes	

1.5b Final Sounds (FS)

FS-1	Same Ending	
	Materials:	Basket of objects/pictures ending in the same phoneme
	Aim:	Auditory and visual reinforcement of ending sounds
	Presentation:	Teacher takes out three objects/pictures ending in the same phoneme. She asks the students to say the name of the objects/pictures. Ask the students if they can hear the last/final phoneme in <i>cat, bat, hat</i> Continue with three more objects/pictures with the same ending. Now mix the two sets of objects/pictures and ask them to sort it out by the same ending sound.
	Extension:	This can be done orally by giving words ending in the same sound.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

FS-2	Name Ending	
	Materials:	Student names from the classroom or see the *list of student names below
	Aim:	To reinforce the understanding of final phonemes
	Presentation:	This game is very similar to the one played with the initial sounds. Teacher must enunciate the final sound very distinctly and say, 'I am thinking of someone's name that ends in /n/ sound. Can you guess whose name ends in /n/? Yes, Ethan Students find this to be a fun game.
	Extension:	Ask a student to be the leader and play the above game. When they are comfortable with this exercise, give them the initial or final sounds of the student and guess the name.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – FS-2

List of words (FS-2)

I am thinking of someone's name that ends in:

<i>/ee/</i>	<i>Molly</i>
<i>/d/</i>	<i>Maud</i>
<i>/s/</i>	<i>Linus</i>
<i>/r/</i>	<i>Taylor</i>
<i>/ee/</i>	<i>Tiffany</i>
<i>/x/</i>	<i>Pax</i>
<i>/n/</i>	<i>Zain</i>
<i>/l/</i>	<i>Zaal</i>
<i>/c/</i>	<i>Zach</i>
<i>/n/</i>	<i>Helen</i>
<i>/m/</i>	<i>Ram</i>
<i>/f/</i>	<i>Cliff</i>
<i>/l/</i>	<i>Sal</i>

FS-3	Deletion of Final Sounds in Syllables	
	Materials:	*Student or people names
	Aim:	To become aware of individual sounds within syllables
	Presentation:	Teacher says a name, <i>Jane</i> . Students echo <i>Jane</i> . Now the teacher asks them to say it without /n/ and they will say, <i>Jay</i> .
	Extension:	This game can be done with objects in the room or words from the unit being studied.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – FS-3

Some examples of names/objects (FS-3)

<i>Maid</i>	<i>without</i>	<i>/d/</i>	<i>will be</i>	<i>may</i>
<i>Page</i>		<i>/j/</i>		<i>pay</i>
<i>Grace</i>		<i>/s/</i>		<i>gray</i>
<i>Dave</i>		<i>/v/</i>		<i>day</i>
<i>Jake</i>		<i>/k/</i>		<i>Jay</i>
<i>Ford</i>		<i>/d/</i>		<i>for</i>
<i>Blake</i>		<i>/k/</i>		<i>blay</i>
<i>Curt</i>		<i>/t/</i>		<i>cur</i>
<i>Zain</i>		<i>/n/</i>		<i>Zay</i>
<i>Kate</i>		<i>/t/</i>		<i>Kay</i>
<i>Mike</i>		<i>/k/</i>		<i>My</i>
<i>Maine</i>		<i>/n/</i>		<i>May</i>

FS-4	Deletion of Initial/Final Sounds in Syllables	
	Materials:	*Student or pet or any names or objects
	Aim:	To reinforce the understanding of final and initial phonemes
	Presentation:	Teacher mixes both initial and final sounds deletion. Teacher says a name, <i>Jane</i> . Students echo Jane. Now the teacher asks them to say it without /n/ and they will say, 'jay'. Do the above with the initial sound missing.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – **FS-4**

List of objects (FS-4)

<i>Cat</i>	<i>without</i>	<i>/t/</i>	<i>will be</i>	<i>ca</i>
<i>Hal</i>		<i>/l/</i>		<i>ha</i>
<i>Peter</i>		<i>/p/</i>		<i>eater</i>
<i>Lane</i>		<i>/n/</i>		<i>lay</i>
<i>Zoro</i>		<i>/Z/</i>		<i>oro</i>
<i>Della</i>		<i>/d/</i>		<i>ella</i>
<i>Nose</i>		<i>/z/</i>		<i>no</i>
<i>Feet</i>		<i>/t/</i>		<i>fee</i>
<i>Dug</i>		<i>/d/</i>		<i>ug</i>
<i>Soap</i>		<i>/p/</i>		<i>sow</i>
<i>Dame</i>		<i>/m/</i>		<i>day</i>
<i>Paid</i>		<i>/d/</i>		<i>pay</i>

FS-5	Deleting and Changing Sounds	
	Materials:	*Student or pet or any names
	Aim:	To reinforce and manipulate final phonemes
	Presentation:	Teacher can point to a picture on a magazine page or just say a name, Page . Students echo Page . Now replace /j/ in Page to /l/. Students say pale . Work with several names in this way. A magazine, or a poster of different faces can be used.
	Extension:	Once they are comfortable with this exercise, give them the initial or final sounds of the student and guess the name.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – FS-5

List of words (FS-5)

Say	<i>maid</i>	instead of	/d/	say	/l/	(mail)
	<i>Page</i>		/j/		/d/	(paid)
	<i>Grace</i>		/s/		/d/	(grade)
	<i>Dave</i>		/v/		/m/	(dame)
	<i>Hope</i>		/p/		/s/	(hose)
	<i>Class</i>		/s/		/p/	(clap)
	<i>Sam</i>		/m/		/d/	(sad)
	<i>Prod</i>		/d/		/m/	(prom)
	<i>Seen</i>		/n/		/d/	(seed)

FS-6	Take It Out	
	Materials:	*List of words with sets of two/three same endings and one with a different ending
	Aim:	To reinforce the understanding of final phonemes
	Presentation:	Teacher says four words. Students echo them. Teacher asks them to take out the word with a different ending. Teacher says, ' <i>cat, mat, pan, fat</i> ' Students echo these. Now teacher asks them to pick out the word with a different ending....' <i>pan</i> '
	Extension:	This exercise can be done with names of students, pets, pictures, or objects in class.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – FS-6

List of words (FS-6)

pig, jig, **Jill**, dig

met, **beg**, bet, net

dot, not, lot, **log**

as, gas, **gap**, has

had, hid, **not**, bed

so, **day**, no, go

cam, dam, ram, **hid**

ruff, muff, **rum**, deaf

tree, **eat**, three, be

stack, back, pack, **log**

fish, dish, **ditch**, wish

shrill, bill, drill, **fit**

FS-7	Final Sound Addition	
	Materials:	*List of words
	Aim:	To reinforce the understanding of final phonemes
	Presentation:	Teacher says sometimes a new word can be created by adding a sound to the end of a word like in, 'boo.' Students echo 'boo.' If you add /t/ to it what is the word? Students echo <i>boo—t</i> and say <i>boot</i> . Continue with the list of words in the same fashion.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – FS-7

List of words (FS-7)

<i>Coal</i>	<i>add</i>	<i>/d/</i>	<i>new word is</i>	<i>cold</i>
<i>Bee</i>		<i>/t/</i>		<i>beet</i>
<i>Go</i>		<i>/t/</i>		<i>goat</i>
<i>See</i>		<i>/m/</i>		<i>seem</i>
<i>Bee</i>		<i>/n/</i>		<i>bean</i>
<i>Far</i>		<i>/m/</i>		<i>farm</i>
<i>No</i>		<i>/s/</i>		<i>nose</i>
<i>See</i>		<i>/d/</i>		<i>seed</i>
<i>Tie</i>		<i>/m/</i>		<i>time</i>
<i>Rye</i>		<i>/d/</i>		<i>ride</i>
<i>Row</i>		<i>/d/</i>		<i>road</i>
<i>Moo</i>		<i>/n/</i>		<i>moon</i>
<i>Lay</i>		<i>/t/</i>		<i>late</i>
<i>Tie</i>		<i>/t/</i>		<i>tight</i>
<i>Bow</i>		<i>/n/</i>		<i>bone</i>

1.5c Medial Sounds (MS)

MS- 1	Find the Vowel Sounds	
	Materials:	*List of words Pictures/objects optional
	Aim:	Auditory reinforcement of the understanding of medial phonemes
	Presentation:	T: Explain what medial sound is. This has been given during alphabet time...A is initial letter; Z is the final letter and all the letters between A and Z are medial letters. Teacher: Say 'bag' (saying the /a/ little louder.) Students: Echo 'bag'. Teacher: What medial sound did you hear? Students: Say /a/. Examples of words are given on the next page.
	Extension:	This exercise can be done with pictures of cvc words and ask the students to identify the medial sound after echoing the words in the pictures. Give a vowel and ask students to make a cvc word.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page -MS-1

List of words (MS-1)

<i>mad</i>	<i>jig</i>	<i>fax</i>
<i>pad</i>	<i>leg</i>	<i>kit</i>
<i>jam</i>	<i>den</i>	<i>lip</i>
<i>Jim</i>	<i>men</i>	<i>dull</i>
<i>rim</i>	<i>sit</i>	<i>pug</i>
<i>dog</i>	<i>am</i>	<i>sub</i>
<i>log</i>	<i>bin</i>	<i>mop</i>
<i>dip</i>	<i>fog</i>	<i>rod</i>
<i>bed</i>	<i>Don</i>	<i>gas</i>
<i>hen</i>	<i>pog</i>	<i>had</i>
<i>sun</i>	<i>fun</i>	<i>beg</i>
<i>mud</i>	<i>dug</i>	<i>fit</i>

MS-2	Change the Vowel Sounds	
	Materials:	*List of words with CVC sounds Counters to represent sounds
	Aim:	Visual reinforcement of medial phonemes
	Presentation:	Teacher says the word, <i>net</i> . Place the 3 counters touching each one saying /n/ /e/ /t/ Students echo the word, <i>net</i> . Teacher says, what medial sound did you hear? Yes, /e/ Now change /e/ to /i/, what is it? Teacher can take the medial sound out and place another counter to represent /i/. Students say the new word, ' <i>nit</i> .' Continue with other words.
	Extension:	Once they are comfortable with this exercise, give them pictures where the medial sound changes. Examples: cat to cot pig to peg mat to mud nut to net More games can be found in the book, "Listening Games for Elementary Grades" By M. J. Maxwell
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page – MS-2

List of words (MS-2)

/a/	in	sat	to	/i/	(sit)
/a/		mat		/u/	(mut)
/e/		pen		/i/	(pin)
/e/		set		/a/	(sat)
/i/		bit		/a/	(bat)
/i/		rip		/a/	(rap)
/u/		rub		/i/	(rib)
/u/		bud		/e/	(bed)
/o/		got		/e/	(get)
/o/		rot		/a/	(rat)

1.5d Combining Sounds(CS)

CS - 1	How Many Sounds Do You Hear?	
	Materials:	*Pictures of words with 2 sounds (CS-1) 2 counters **Card with three squares template (IS-6)
	Aim:	Auditory reinforcement of sounds Analyze syllables into phonemes Preparation for reading, writing
	Presentation:	This exercise can be done in small groups. Teacher distributes the counters to the student groups. Counters represent sounds. She shows a picture of an 'ax' to the class. Teacher says the word 'ax' with a pause between the two letters like: a..... x. The students echo 'a.....x.' Teacher moves one counter down, say /a/. She now touches and moves the other counter and says /x/ and pulls it down. Students do the same with their counters. Now the teacher puts the counters together from left to right, very slowly stretching out the /a/ and holding the breath until she touches the 'x' and says /x/. She pronounces it as /ax/. This is when the students hear /ax/. Students practice with several pictures. Show the next picture and ask the students to pull down a counter for each sound.
	Extension:	Start off with two (vc) sound words and then expand to three (cvc) sound words. This exercise can also be done by giving words with two sounds orally.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson
	Notes	

* See picture titled - **CS-1**

See card template - **CS-6

CS-2	Put the Sounds Together	
	Materials:	*Pictures with two sound words (CS-1) 2 counters Card with three square template (CS-6)
	Aim:	Auditory, visual reinforcement of sounds to form words Put sounds together to form syllables Preparation for reading
	Presentation:	Teachers can use the same pictures as in CS-1 exercise. This time, the teacher does not show the picture to the students. She pulls out two counters one at a time saying the sound /a/ /x/ Students will say these sounds repeatedly until they can say it together as /ax/. Now show the picture. Repeat the same procedure with the other pictures.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary
	Notes:	

See picture titled - **CS-1**

CS-3	Count the Sounds	
	Materials:	*Pictures/**Words with 1,2,3 sounds Counters Card with three square template (IS-6)
	Aim:	Awareness of phonemes Direct preparation for reading, writing
	Presentation:	Today we are going to count the sounds in the words. Counters represent the sounds. T: says 'ta' very slowly and deliberately, /t/-/a/. What is the first sound you hear? Yes, 't' and pulls down a counter. What is the other sound you hear in /ta/? Yes, 'a' and pulls down another counter. /t/...../a/. Show them the two counters that represent the sounds /t/,/a/. Repeat the same procedure with the other pictures/words.
	Extension:	Show pictures or objects and ask them to name and count the sounds.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes:	

*See pictures titled - CS-1

** See examples on next page

List of words (CS-3)

Ta_ (2)	Eye (1)	<i>cup (3)</i>
Ma_ (2)	Knee (2)	log (3)
Pa_ (2)	Bee (2)	Pig (3)
Pi_ (2)	Tie (2)	Sun (3)
Si_ (2)	See (2)	Coat (3)
Lo_(2)	Bow (2)	Log (3)
Ro_(2)	Egg (2)	Row (2)
Up (2)	It (2)	If (2)
Key (2)	Ad (2)	Toe (2)
Cat (3)	Rag (3)	Boat (3)

CS-4	Make a word -Body Coda Blending (with objects)	
	Materials:	Set of objects with one syllable words
	Aim:	To learn to blend words using body coda Preparation for reading
	Presentation:	Today we will look at some objects and learn to divide the words into 'body' and 'coda.' 'Body' is all the sounds up to and including the Vowel. 'Coda' is all the sounds after the vowel. Teacher: This is a 'hat'. We will divide 'hat' into body and coda. Body is /ha/ Coda is /t/ Ha---t Now your turn. This is a 'pig'. Body is 'pi' Coda is 'g' Pi---g Continue with several one syllable objects.
	Extension:	Practice with the names of objects in the classroom. Teachers may want to start off with /a/ as the vowel and slowly move on to the other vowels. This is great preparation for reading.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes:	

CS-5	Make a word -Body Coda Blending (with pictures)	
	Materials:	*Set of one syllable picture cards (CS-5/R4) and Word list**
	Aim:	To learn to blend words using body coda; Preparation for reading
	Presentation:	Today we will look at some pictures and learn to divide the words into 'body' and 'coda.' Body is all the sounds up to and including the Vowel. Coda is all the sounds after the vowel. Teacher: This is a 'net'. We will divide 'net' into body and coda. Body is /ne/ Coda is /t/ Ne---t Now your turn. The picture is 'mat'. Body is 'ma' Coda is 't' Ma---t Continue with several words with one syll. pictures.
	Extension:	Give clues for words and students can guess the word and then divide into body and coda. For example, I am thinking of an animal that slithers and could be poisonous. What is it? Yes, snake. Sna—ke More abstract way is to give students some words and ask them to divide it into 'body and coda.' (List on next page) This is great preparation for reading.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes:	

* See pictures titled CS-5/R4

2 Alphabet (AL)

The knowledge of letter names and their shapes is an important precursor and a predictor of future ability to read and spell. The alphabetic principle is critical in beginning reading and is the relationship between letters of the written language and spoken words.

Students are not always automatically aware of the relationship between upper and lower-case letters. These must be taught explicitly at the preschool level.

Learning modules in this section include the following and all are taught with fun games, songs and by auditory, visual, and kinesthetic ways.

Names of letters

Shapes of letters

Sequencing

Concept of Consonants

Concept of Vowels

Upper and Lower-case letters

AL-1	Introduction to the Alphabet Uppercase	
	Materials:	The ALPHABET MAT a set of blue upper-case plastic letters
	Aim:	To familiarize the students with the letters and sequence of the alphabet; To introduce the terms first/initial, last/final, middle, and medial; 26 letters in total; 13 letters in the first half and 13 letters in the last half.
	Presentation:	T: Points to the letters on the 'Upper Case' side and say these are the letters of the alphabet. Each letter has a name. The name of the letter will always stay the same. Ask the students to get their mats out to the 'Upper Case' side. Let's count the letters. There are 26 letters in the alphabet. A is the first or initial or beginning letter of the alphabet. Z is the last or final or the ending letter. Place A and Z on the mat. Let's find the middle of the alphabet. Touch one finger on A and one finger on Z at the same time. Now touch each letter as you move toward the middle. Stop when you get to M. The middle is between M and N. The middle means something should divide into two equal parts or halves. Place the letters M and N on the mat. Let's count the letters A through M. There are 13. Now the letters between N and Z. There are 13. All letters between A and Z are called medial.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes:	

AL-2	Sequential Placement Uppercase	
	Materials:	The ALPHABET MAT A set of blue upper-case plastic letters
	Aim:	To sharpen the student's knowledge of the names of the letters of the alphabet and the sequence of the alphabet.
	Presentation:	Students must have their mats out. T: Touch each letter of the alphabet as I say the name. Together: A is the first/initial letter Z is the last/final letter M and N are the middle letters All the letters between A and Z are called medial letters There are 26 letters in all 13 in the first half and 13 in the last half Take out all the blue upper-case plastic letters and lay them on the mat. Turn all letters to the smooth side. Place A and Z on the mat; Then place M and N on the mat; Touch A again and start to name and place each letter.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-3	Sequential Placement : Review	
	Materials:	The ALPHABET MAT A set of blue upper-case plastic letters
	Aim:	To sharpen the student's knowledge of the names of the letters of the alphabet and the sequence of the alphabet. The goal is for each student to finish in 3 minutes or less.
	Presentation:	Students must have their Upper-Case side of the mats out. T: Touch each letter of the alphabet as I say the name. Together: A is the first/initial letter; Z is the last/final letter; M and N are the middle letters; All the letters between A and Z are called medial letters; There are 26 letters in all; 13 in the first half and 13 in the last half; Take out all the blue upper-case plastic letters and lay them on the mat. Turn all letters to the smooth side. Place A and Z on the mat; Then place M and N on the mat; Touch A again and start to name and place each letter on the arc. Review by touching each letter with left hand until 'M' and use the right hand to go from 'N through Z'.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-4	Sequential Placement Lowercase	
	Materials:	The alphabet mat on the lower-case side A set of red lower-case plastic letters.
	Aim:	To introduce the lower-case letters to the students.
	Presentation:	Look at the new mat and discuss the new features. Then review concepts taught previously. a is the first/initial letter; z is the last/final letter; m and n are the middle letters; All the letters between a and z are called medial letters; There are 26 letters in all; 13 in the first half and 13 in the last half; Take out all the red lower-case plastic letters and lay them on the mat. Turn all letters to the smooth side. Place a and z on the mat; Then place m and n on the mat; Touch a again and start to name and place each letter on the mat.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-5	Lowercase and Uppercase letter placement Review	
	Materials:	The alphabet mat a set of (blue) upper-case plastic letters a set of (red) lower-case plastic letters
	Aim:	To introduce the lower-case letters to the students and compare them to the upper-case letters. The goal is for every student to finish in 4 minutes or less.
	Presentation:	Review concepts taught previously. a is the first/initial letter; z is the last/final letter; m and n are the middle letters; All the letters between a and z are called medial letters; There are 26 letters in all; 13 in the first half and 13 in the last half; Take out all the red lower-case plastic letters and lay them on the mat. Turn all letters to the smooth side. Place 'a and z' on the mat; Then place 'm and n' on the mat; Touch 'a' again and start to name and place each letter on the mat. When finished lay the upper-case letters above/below the lower-case letters.
	Extension:	NONE
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-6	Names of Vowels	
	Materials:	The alphabet mat A set of red lower-case plastic letters Purple vowels Mirrors for each student *Song sheet
	Aim:	To teach the names of Vowels
	Presentation:	Ask each student to place the alphabet mat on the lower-case side of the table. Turn all letters to the smooth side. Look at the two different colors. Go over concepts already taught as in AL-4. Let us look at the purple letters, name each one of them. a, e, i, o, u These letters are called 'Vowels.' The students echo, 'Vowels.'
	Extension:	For variation, teach them the name of the vowels through the nursery rhyme, BINGO. Mix the consonants and vowels and ask the students to pick a letter and identify if it is a vowel or a consonant.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See song on next page – **AL-6**

Vowel Song: (AL - 6)

(Sung to the tune of 'BINGO')

I know the Vowels of the alphabet

And all 5 of their name ohs!

a, e, i, o, u and

Vowels are their name ohs!

AL-7	Before and After Hand	
	Materials:	alphabet mat- lower case side Students' hands (Left Hand, Right Hand)
	Aim:	To teach the concept of before and after
	Presentation:	This lesson can be done in groups of 4-5 students. T: Place your mats in front and place both your hands on the mat. Point to the letter m. Your left hand is on the letter m. This is called the 'beforehand.' Do 3-Period lesson. Demonstrate that l comes before m; d comes before e, etc. Do lots of examples and review daily. Your right hand is on letter n. This is called the after hand. Do a 3-Period lesson. Demonstrate that 'n' comes after 'm'; p comes after o, etc. Do lots of examples and review daily. For some students this concept may take longer to understand than others. In that case, do only before concept for a few days and introduce the after concept.
	Extension:	Place the students in a line and ask them who are before and after. This can be done daily when they go out.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

AL-8	New Alphabet Review	
	Materials:	alphabet mat- lower-case Side Foam shaped hands with before and after written on them/ students can use their hands
	Aim:	To reinforce alphabet concepts taught so far: before, after, initial, final, medial, middle, vowels, consonants.
	Presentation:	T: Place your alphabet mat showing lower-case side on the table. T: Echo after me. S: Echo the following mantra. There are 26 letters in the alphabet There are two kinds of letters in the alphabet: <u>Vowels and Consonants</u> The vowels are 'a e i o u' a is the initial letter z is the final letter m and n are the middle letters The letters between a and z are medial letters My left hand is my 'before hand' My right hand is my 'after hand'
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-9	Shapes of the letters	
	Materials:	Pipe cleaners shaped as: horizontal, vertical lines; diagonal; crisscross; up-down; full circle; half circle; *song sheet
	Aim:	To introduce the shapes/lines found in the 26 letters; indirect preparation for writing
	Presentation:	Teacher will hold up each shape and ask the students to point to their shapes and echo the names. This is 'Horizontal' This is 'Vertical' This is 'Diagonal' This is 'Criss-Cross' (with 2 diagonals) This is 'Half circle' This is 'Full Circle' This is 'Camel hump' These are the strokes and curves used to make all the manuscript letters. Do a 3-period lesson with these strokes. Practice this for a few days in different ways.
	Extension:	This activity can be done using their arms or full body or wikki stix; playdoh, or yarn . *Review the shapes by using a nursery rhyme, 'Frere Jacques.'
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See song on next page

Shape song (AL-9) (Sung to the tune of Frere Jacques)

Horizontal, Horizontal

Vertical, Vertical

Diagonal, Diagonal

Criss-cross; Criss-cross

Full circle, Full circle

Half circle, Half circle

Camel hump; camel hump

Helps to learn

The shapes of letters

AL-10	Look and Say	
	Materials:	ALPHABET MAT Set of blue plastic upper-case letters in a bag
	Aim:	To identify letters by looking Review of the previous lesson Indirect preparation for reading, writing
	Presentation:	This can be done in small groups. Give each student an ALPHABET MAT, showing the upper-case side. T: I will take a letter out of my bag and describe the strokes in it. You will tell me what letter is being described. This letter has a vertical line and a short horizontal line on the top . What letter is it? S: can look at the mat and think. The letter is ‘T’ . This letter will now be placed on the mat while naming it. Teacher will describe several letters using the same verbiage as in module AL-9. This goes on for a few days.
	Extension:	Students can form partners and pick a letter and describe it to each other.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-11	Guess What?	
	Materials:	Alphabet Mat Set of plastic upper-case/ lower-case letters in a bag
	Aim:	To identify letters by feel Internalization of the shape of the letters
	Presentation:	This can be a game played with a small group of students or the whole class. The teacher will have one mat and a bag of letters. T: Places the Alphabet Mat on the table. S #1: Pulls out a letter from the bag, feels the shape of the letter and tries to guess the name of the letter. He then places it on the mat while naming it. S #2: Pulls out another letter and feels it and guesses the name. He will place it on the mat while naming it. This game can continue until all the letters are gone.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-12	Let Go of the 'Z'	
	Materials:	2 Players 2 Alphabet mats 2 Dry erase markers
	Aim:	To reinforce the sequencing skills by sight Indirect preparation for reading, writing
	Presentation:	Each player will take turns saying the letters in two or three. Player number one says 'ab' and marks off the letters on his mat. The player number two will also mark off the 'ab' and now will say 'cde' and mark it off. Player number one then says "fg' or 'fgh' As the letter names have been said they are marked off so that the students remember which letters have been said already. The ultimate object of this game is not to say 'z'.
	Extension:	This game can be played in another way. It is called ' take the z '. This game is played the same way as above. The only variation is that the player who says the 'z' will be the winner.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-13	Race To Finish	
	Materials:	Alphabet Mat One set of upper/lower-case letters in a bag to be used as the draw bag Two players
	Aim:	To identify the position of letters in the alphabet Before and after
	Presentation:	Teacher picks 2 letters from the bag and places them on the Alphabet Mat – e.g. G, S Each player draws 12 letters from the bag of upper/lower-case letters. Each player places the letters in front of him. Now the player looks at his letters to see if he has a letter that goes before or after one of the letters placed on the mat i.e., G or S. If he has the letter that goes before or after the placed letter, he places it in the appropriate place on the mat and say.... F/f comes before G/g or T/t comes after S/s. The players take turns placing the letters. The first player to place all his letters on the mat wins the game.
	Extension:	Teacher picks a letter and ask what comes before and after that letter.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

AL-14	Nearest to Z or A	
	Materials:	Alphabet Mat One set of lower/upper-case letters in a bag to be used as the draw bag.
	Aim:	To identify the position of letters in the alphabet Before and after
	Presentation:	Each player draws one letter from a bag of letters. Both the players place the letters in front of them. The player that has a letter nearer to Z will say ' s is nearer to z ' than the opponent's letter which may be ' f '. This player puts both the letters in his pile. This continues until all the letters are used. The player with the greatest number of letters wins.
	Extension:	This game can be played ' nearer to A ' in a very similar manner.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-15	Letter Snoop	
	Materials:	Alphabet Mat One set of plastic lower-case / upper-case letters
	Aim:	To identify the position of letters in the alphabet Fluency in naming letters.
	Presentation:	This game can be played with a student and a teacher or between 2 students. Student places all 26 letters on the arc. Student should touch and say the letters. Student closes his eyes, and the teacher takes off one letter. The teacher pushes back the letters so that there are no gaps on the arc. The student opens his eyes and names the missing letter. If he cannot name the letter, then have him touch each letter and say until he discovers the missing letter. Put the letter back on the arc and play again. It will help the teacher to write the letters already done.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-16	Ten Questions	
	Materials:	Alphabet Mat A set of blue or red plastic letters.
	Aim:	To identify the position of letters in the alphabet and fluency in naming letters.
	Presentation:	Students will place letters on the mat. Touch and name the letters. Teacher: I am thinking of a letter. I want you to guess it. You may ask me questions but the answers to them may only be “yes” or “no” answers. You will get ten turns to guess the name of the letter. For example, “is your letter in the first half of the alphabet?” Take off the letters as they are eliminated. Examples of questions to ask: Is the letter made up of only straight lines; does it have 2 humps; or curve? Is the letter a vowel? Does it come before ____? The object of the game is to guess the letter by asking ten questions or less.
	Extension:	Students can play against another student. When the letters are eliminated, they can be crossed out using a dry erase marker. If using a temporary paper strip, the eliminated letters can be cut off. The last letter will remain.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson
	Notes	

AL-17	Alphabet Dice Roll and Name	
	Materials:	Alphabet Mat Alphabet Dice A set of upper-case/lower-case plastic letters
	Aim:	To become more fluent in naming letters.
	Presentation:	Place the alphabet mat on the table. Place all the uppercase/lowercase letters on the mat but not on the arc. Roll the dice and name the letter. Find the plastic letter and place it on the mat. Another variation would be to place all the letters on the arc of the alphabet mat before rolling the dice. When the dice is rolled that letter could be taken out of the mat.
	Extension:	Another game is where there are several dice with letters on them. Roll all the dice and the student takes 2 dice. The dice will be placed on the table, and the student must name the letters from the first die to the next. If a student picks 'g' and 'k' he will have to name all the letters from 'g' to 'k'. One more extension will be to roll the dice. Name the letter that comes before/after that rolled letter.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-18	Bean Bag Toss	
	Materials:	Alphabet Mat or Strip
	Aim:	To become more fluent in naming letters.
	Presentation:	Place the alphabet mat / strip between the two players. Teacher and the student will toss the bean bag to each other in these 3 games. Game #1 T: Toss the beanbag to your student and say “A”. S: says “B” and tosses the beanbag back to the teacher. Continue until a player gets to “Z”. This game will finish in one round. Game #2 Players say two letters of the alphabet. “AB---CD---EF—” This game will finish in one round. Game #3 Players name three letters. “ABC---def---ghi—”. This game will finish in three rounds.
	Extension:	This game can be done with cluster of 4-5 letters like: ABCD---EFGH—etc.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-19	Alphabet Talk	
	Materials:	Make small cards with punctuation marks for period, question, exclamation, comma *Sheet with letters written with punctuation marks
	Aim:	To learn to use the correct intonation while speaking, reading, and writing Introduction to punctuation marks Indirect introduction to reading
	Presentation:	T: Today we will learn to use marks called punctuation marks to make meaning of sentences clear. These marks will help the listener and the reader understand what you are saying. These marks are used every day for writing. Introduce one punctuation mark at a time. We will talk about four marks. Each letter is treated as a word or a syllable for this exercise. Period (.) Used to end a sentence. ABC. DEF. GHI. JKL. MNO. PQR. Exclamation (!) Used to end a sentence that is exciting or said loudly! ABC! DEF! GHI! JKL! MNO! PQR!..... Question mark (?) Used to ask a question. ABC? DEF? GHI? JKL? MNO? PQR?..... Comma (,) Can be used in many places to indicate a pause. ABC, DEF, GHI, JKL, MNO, PQR..... Once all the 4 marks are introduced, say a group of letters as if in conversation.
	Extension:	Read a book with punctuations and ask the students to use gestures for punctuations.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page

Alphabet Talk- AL-19

ABC. DEF? GHI! JKL. LMN? OPQ! RST. UVW? XYZ!

AB? CDE. FG! HIJ? KL. MNO! PQ? RST. UV! WX? YZ.

abc! de. fgh? ijk! lmn? op. qrs? tuv! wx. yz?

Variations:

1. Conversation
Abc de fgh, ij klm nop?
Qrs, tuv, wxy z!
2. This can be done using gestures.
Make a fist for period, take a breath for comma,
Hands up for exclamation, and hands in air for question
3. Use the alphabet mat and students can come up with
conversations with their partners.

AL-20	Alphabet Accent	
	Materials:	Alphabet strip/alphabet mat
	Aim:	To recite alphabet with accents with a visual reference; movements; indirect preparation for syllables, writing and reading
	Presentation:	T: will say A B C D E F G H I J K L M N O P Q R S T U V W X Y Z I recited the alphabet with a change, what is it? S: One was loud and the other one was soft. T: Yes, I said A louder and B softer. My voice went higher. This is called an Accent. In English words are said with an accent. Let us accent the first and not accent the second and so on. A B C D E F G H I J K L M N O P Q R S T U V W X Y Z Next is to accent on the second letter and not on the first. A B C D E F G H I J K L M N O P Q R S T U V W X Y Z This can be done by looking at the strip. It can be done by jumping up for accent and on the floor for no accent. Make it fun by doing movements.
	Extension:	Say the alphabet in pairs (AB, CD)and accent the first pair and not accent the second and so on. Say the alphabet in threes (ABC, DEF)and accent the first and not the second chunk. Do these also with movements.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes:	

AL-21	Alphabet Triplets – Missing letter	
	Materials:	Alphabet strip/ alphabet mat Alphabet deck with the end letter missing (ab--, cd--)
	Aim:	Reinforce the sequence
	Presentation:	Have the alphabet mat in front of the student. Show one card at a time and ask the student to name the sequence. Present it in order the first time. e.g., ab <u>c</u> , def <u>g</u> hi <u>l</u> etc Even though only one letter is missing, the student will say the letters on the card and the missing letter. If the student accurately names the sequence, shuffle the cards and present the cards randomly.
	Extension:	This can be done with the first letter missing or the middle card missing. This may be a challenge for some students.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

AL-22	Alphabet Recognition	
	Materials:	AL22a, AL22b, AL22c Charts on following pages
	Aim:	Recognition of letters
	Presentation:	Teacher shows the charts to the students. Students read and name the letters from left to right.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes

AL-22c Letter Recognition Chart

3 Phonics (P)

Phonics is the relationship between the phonemes(sounds) and the graphemes (letters) that represent these sounds. This phonics knowledge is used to help to recognize words when reading and spell words when writing. A phoneme is the smallest unit of sound that distinguishes one word from another. Graphemes are the written representation of phonemes. In phonics instruction the students learn that the letter d makes the sound /d/. Students need to have a strong phonics base to become skilled readers. There are 26 letters but 45 phonemes as some letters have more than one sound. Phonics should be taught very systematically and explicitly.

The letters are presented in the following order to students:

m	t	a	s	b	c	---	Red
n	l	i	r	f	p	---	Yellow
h	g	o	k	d		---	Green
j	x	e	v	z		---	Orange
w	u	qu	y			---	Blue
ch	ck	th	th	sh		---	Purple

All sounds are introduced using the three pathways – Visual, Auditory, Kinesthetic, and Tactile (VAKT) modes at the same time. When the information is received through more than one sensory pathway, there is an increased learning and retrieval.

Sandpaper letters help to gain muscular memory of the shape of letters. Using a sand tray, rice, salt tray, foam or any other medium will ignite the multiple learning pathway in the brain.

The sandpaper letters and the phonogram cards are **color coded** for the letters as noted above.

It is ideal to start from the top cluster (red) and then move on to the next. Introduce **three sounds each day** to a small group (3-5) of students. The following day these sounds are reviewed and if the students show progress, the next three sounds can be introduced. Each sound is reviewed at the start of every lesson. Hence new sounds are introduced while folding in the old sounds – systematic and cumulative (see pg. 8).

The Learning modules in this section address Phoneme introduction, Keyword introduction, Concept of Consonants, Concept of Vowels, and Pre-writing skills.

Appendix 3 provides content for creation of Phonogram and Keyword cards that will be used in the learning modules presented in this section.

P-1	Sound Introduction	
	Materials:	Sandpaper lowercase manuscript letters Keyword cards for letters t,m,a
	Aim:	To develop auditory, visual, and kinesthetic perception of letter sounds
	Presentation:	This activity should be done in smaller groups. Bring two or three letters (t,m,a) to the table. Letters should be different in shape and sound. Seat students to your right for presentation. Discovery Give a mirror to each student. Look at your mouth in the mirror as you echo 'tiger, top, table'. What initial sound do you hear in tiger, top, table? Students say..... /t/ Airflow blocked by? – tongue, teeth, or lips? Students say tongue. Bring the sandpaper letter 't' out. T: This is letter 't' that makes the sound /t/. Show the key word and sound card for letter 't.' t, table , /t/; Students echo t, table, /t/ Tell the students that these special words trigger the sound of each letter. Trace the letter 't' while making the sound /t/. Say this is how we write it. Now students echo and trace the sound /t/. *Be very precise in tracing the letter, using the first and second fingers of your dominant hand. Invite the students to take turns tracing the /t/ while saying the sound three times. (Continued on next page)

		Repeat procedure with letters (m, a). For review, do a three-period lesson. 1. Place the three letters t, m, a on the table. 2. Say '<u>show me or point to</u> /m/, /t/, /a/' asking them to show/point to each sound. Student points and echoes the sound. 3. While pointing out the letters the teacher asks: what <u>is this?</u> starting with /a/, /t/, /m/. Start with the last letter you asked him to point in step #2. <u>Tracing, showing, and asking</u> are three components of the three-period lesson. The three-period lesson can be thought of as <u>association; recognition; recall</u>.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

***Note: do not hold the student's hand to show him how to trace, as this causes muscular tensions. If he has trouble show multiple times.**

P -2	Sound Review	
	Materials:	Sandpaper letters *Keyword and sound cards for the letters done the day before
	Aim:	To develop memory device to unlock the sounds Provides letter-sound connection To prepare for reading, writing
	Presentation:	Explain the **skywriting procedure to the students. T: shows keyword and sound cards for t . Students echo 't table /t/' (name, key word, sound) while skywriting . Teacher brings the sandpaper letters t, m, a to the table. While showing the letter t to the students, teacher says trace the letter while saying the name, key word & sound . Repeat the above procedures for m, a . Practice and review this activity for two to three days until the student learns them. When the students are ready to move on, introduce two or three new letters at a time.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See Card Content in Appendix 3

**** Skywriting** is a process that uses the whole body to learn to write the letters. It is done with the dominant hand. It involves the use of large muscles of the upper arm and shoulders. The movement of these muscles produces a strong neurological imprint of letter shapes (Waites & Cox, 1976).
The hand is stretched out, fully locked, in front of the student. Two of the fingers (pointer and middle fingers) are extended to write large letters in the air while saying the name of the letter. This develops strong muscle memory.

P-3	Foam Sticks in a Jar Game	
	Materials:	Foam Sticks with the letters written Objects (optional)
	Aim:	To reinforce the beginning sounds To develop auditory and visual memory To prepare for reading
	Presentation:	Bring the foam sticks with the letters presented so far. The foam sticks are color coded according to the order of sounds presented. Each student will pick a stick and say the name, keyword, and the sound of the letter. This continues until there are no more sticks in the jar.
	Extension:	For an added variation the student will pick a stick, say the name, and give two more words, beginning with this sound. Bring objects with these beginning sounds and ask to sort them out according to the foam stick that is picked.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

P-4	The Phonogram Card Game	
	Materials:	*Phonogram cards of the letters presented so far
	Aim:	Visual and auditory reinforcement of the beginning sounds To prepare for reading and writing
	Presentation:	Bring the cards of the letters presented to the table. Teacher will hold the card one at a time. Give me the name, keyword, and sound as you skywrite. The students will say the name, keyword, and the sound of each letter while skywriting. This continues until there are no more cards.
	Extension:	This can be done in smaller groups of 3-5 students. Place all the cards done so far, face down. Students will take turns to pick up one card and say the name, keyword, and sound. Second extension is for the teacher to give the key word and sound and ask the students to guess the name of the letter. Another variation will be for the teacher to give the name and ask the students to respond with the keyword and sound.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See Card content in Appendix 3

P-5	The Picture Game	
	Materials:	*Pictures (IS-8/IS-14/P-5) corresponding to the letter sounds introduced, phonogram cards
	Aim:	Develops visual and auditory memory To refine auditory perception of simple words To prepare for reading, writing
	Presentation:	Teacher will bring the pictures and phonogram cards to the table. The teacher places the three cards t, m, a and the pictures face down on the table. The students take turns to pick a picture and say 'top,' /t/ and place it under the letter t. This continues until there are no more pictures left. Do about 3 different sounds. This lesson can also be done to identify the final sounds or medial sounds. Ask the students to sort them by ending or medial sounds. In the beginning, when working with (medial) vowels, choose only two different vowels at a time.
	Extension:	The students really enjoy this exercise when it is done with objects.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

*Use pictures titled **IS-8/IS-14/P-5**

P-6	Vowels or Consonants?	
	Materials:	Mirror
	Aim:	Concept of vowels and consonants Preparation for reading and writing
	Presentation:	The teacher says: mirrors up. Say the sound /t/. Students echo /t/ looking at their mouth in the mirror. T: What part of the mouth was used to make the sound. Was your mouth open? Is the air flow blocked by the tongue, teeth, throat, or lips? If it is blocked, it is called a Consonant. If it is not blocked, for e.g., /a/, then it is unblocked and is called a Vowel. Do this with all the letters that are introduced.
	Extension:	Ask the students to come up with vowels or consonants. Teacher will ask to give the names of the vowels or consonants learned so far. Place phonogram cards facing down. Students will pick a card and give name, keyword and sound and say if it is a consonant or vowel.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

P-7	Digraphs	
	Materials:	Mirror Pictures/objects optional
	Aim:	Concept of digraphs; preparation for reading; writing
	Presentation:	Teacher: Today we will learn a unique sound. Teacher says: mirrors up. Say words: chair, chips, chat. Students echo the words while looking in mirror. T: what is the sound you hear in the beginning in all these words? S: /ch/ c, h come together to make /ch/. /ch/ is a digraph. /ch/ makes you smile by showing your teeth. Sometimes two letters come together to make one sound. Show hand motions for digraph. These are called 'digraphs.' Do similar introductions for the digraphs /ck/ , /th/ , /th/, /sh/ /sh/ makes the 'quiet' sound /th/ makes you put your tongue out
	Extension:	Show pictures with /ch/ in the initial and final position. Ask students to name the pictures and say if /ch/ is in the initial or final position. Review as all the other letters with the phonogram card with name, kw, // while skywriting.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

4 Reading (R)

For reading, letters are presented to the students in the same order as in “Phonics”; the order is repeated below:

m	t	a	s	b	c	---	Red
n	l	i	r	f	p	---	Yellow
h	g	o	k	d		---	Green
j	x	e	v	z		---	Orange
w	u	qu	y			---	Blue
ch	ck	th	th	sh		---	Purple

R-1	Word Patterns – 1	
	Materials:	5 sets of lower-case plastic letters with extra purple vowels (m, t, a, s, b c) Refer CS-4 module
	Aim:	To learn forming words Preparation for reading, writing, spelling Vocabulary development
	Presentation:	This lesson is done in small groups (3-5). T: Review body coda word blending for words with /a/ as the vowel- (see CS-4). When students begin to identify sounds in the red group (m, t, a, s, b, c) word building may be tried. If it is difficult at this time, wait until more sounds have been introduced. Use only the sounds in red dot group. Bring the letters - m,t,b,c,s and 5 vowels to the table. T: we will make the word /cat/. Tell me the body coda for /cat/. S: ca—t T: Places 5 /a/ one below the other. T: Tell me the initial sound in /ca/. S: /c/ T: Places /c/ left of /a/. T: Runs hand from left to right, says, /ca/. T: What is the coda in /cat/? S: /t/ T: Places /t/ in the final position. T runs her hand under from left to right and reads it as /cat/. T. builds sa, ba, ta, and ma keeping the /t/ in the final position constant. This is repeated for several days. If this is difficult, build only the ‘body’ of the word for a few days and then add the ‘coda’ which is the final //.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

R-2	Word Patterns – 2	
	Materials:	5 sets of lower-case plastic letters with extra purple vowels (m, t, a, s, b, c)
	Aim:	To learn forming words Preparation for reading, writing, spelling Vocabulary development
	Presentation:	When the student is successful with R-1 module, move on to R-2. Review body coda for words with /a/ in the medial position. We will build more words today. T: Places /a/ one below the other on the table. Keep the initial sounds constant and change only the final sounds to make words. E.g., tac, tam, tas, tab, tat Let the student read from left to right after building the body and finish with coda and read again. This is repeated for several days and when they are ready, begin giving words with vowel /a/ constant and changing the initial and final //s. E.g., cam, tab, sat, bat, mat, cat, etc.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

R-3	Word Patterns-3	
	Materials:	5 sets of small plastic letters with extra vowels
	Aim:	To learn word building Preparation for reading, writing, spelling Vocabulary development
	Presentation:	When the second set of sounds is done, the next vowel /i/ can be introduced. Follow the same procedures as in R-1, R-2 modules. When the student can hear the initial, medial, and final sounds, keep only /i/ constant and change both initial and final sounds. Remember to use only the sounds that have been presented and learned so far. T: Places 5 lower-case letters/i/ from top to bottom. The word is /fin/. Tell me the body and coda for /fin/. S: /fi/ /n/. T: What initial sound do you hear in 'fin'? S: /f/; Places /f/ on the left of /i/. T: What is the final sound? S: /n/ T: Runs hand from left to right, says, /fin/. Now give a turn to the students to do the same as above with sim, tin, fib, pit This is repeated for several days. When student is doing well, move on to the next vowels /o/, /e/ and /u/. Repeat the same procedures as above. By now, some students may start decoding. When they become very comfortable with this procedure, start giving words with mixed vowels like pat, tin, fog, bed, sun.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

R-4	Word Builders	
	Materials:	* Pictures/Objects with each short vowel (cvc) words –(CS-5 pictures) 5 sets of lower-case plastic letters with extra vowels Star card with three spaces
	Aim:	Focus on word building Preparation for reading, writing, spelling Vocabulary development
	Presentation:	This lesson is done in small groups (3-5). Start with objects/pictures with vowel /a/constant. Teacher places pictures on the table from top to bottom. Build the words on the star card . T: Pointing to picture of cat , ask, ‘what is the body coda for /cat/? /ca/ /t/. Let us build /ca/ first. What is the initial sound of /ca/? S: /c/ and will place the /c/. T: What is the next sound in /ca/? S: /a/? T: What is the final sound ? S: /t/ T: Runs hand from left to right, says, /cat/. S: Will do the same. Continue with the other pictures. This exercise is repeated for several days with all the other vowels taking one vowel at a time. When the students hear the initial, final and the medial sounds, they are ready to move on to mixed vowel sounds.
	Extension:	The above can be done with objects too.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See pictures titled “CS-5/R-4”

R-5	CVC Words	
	Materials:	*List of two/three letter words Star Card with three spaces
	Aim:	Writing cvc words Auditory reinforcement Preparation for spelling, reading, writing
	Presentation:	T: Today we are going to practice writing more words. I will dictate words and you will echo and pull down the sounds and read. The word is ' <i>mad</i> ' saying each sound distinctly, ' <i>ma d</i> .' Students echo the same and pull down a letter for each sound from left to right. Teacher can use a pattern of words ending in the same sounds; same vowels and keeping the initial letter different in the beginning. This exercise should be repeated many times with CVC words. Do not use digraphs or blends at this time.
	Extension:	Use pictures/objects to do the above. Show a picture to the students and ask them to name it. Now ask them to pull down a letter for each sound they hear in the name.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page

List of words (R-5)

Cat bin bud mop ben

Bat tin mud top ten

Sat fin cud lop den

Mat din dud hop ken

Fat pin sud pop hen

Can pig but god bet

Cab pit bun got ben

Cat pin bug gon beg

Dan rip sun fog den

Mad lit mud bod pet

R-6	Secret Word Game	
	Materials:	List of two/three letter words printed on small pieces of paper and folded
	Aim:	Reading cvc words; visual reinforcement; preparation for spelling, and reading
	Presentation:	This game must be played when the students have done some of the Reading Exercises that are done below. This is a good review. The teacher places several short vowel (CVC) words printed on paper and folded in a bag or a box. Two students can play this game. One student first picks one paper at a time and reads. If he reads it correctly, he gets one point and places the paper outside the bag. If he doesn't read it correctly, he puts the paper back in the bag. The next student takes a turn. This continues until all the words are done.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

R-7	Building Syllable game	
	Materials:	Lower case consonant letters (red) with vowels (either red or purple)
	Aim:	Building syllable one sound at a time by adding, changing, substituting, reversing, and deleting Reading cvc words Visual reinforcement Preparation for spelling, and reading
	Presentation:	This game must be played when the students have done some of the Reading Exercises. Teacher will begin with one consonant and make only one sound change at a time. This exercise should always begin and end with a consonant. Teacher: Pull down or say show me /m/; Student: <u>Echoes and pulls down /m/ and will say /m/ pointing to it with his pointer.</u> T: Now change /m/ to /am/. S: <u>Echoes /am/ and pulls down /a/ and places it in front of /m/ and runs his fingers from left to right and echoes /am/.</u> T: Now change /am/ to /pam/ S: <u>Echoes /pam/ and pulls down /p/ and runs his fingers left to right and echoes /pam/.</u> T: Now change /pam/ to /map/. S: <u>Echoes and switches and echoes /map/.</u> T: Now change /map/ to /ap/. S: <u>Echoes /ap/ and changes to /ap/ and runs fingers from left to right while echoing.</u> T: Now show me /p/. S: <u>Echoes /p/ and takes away /a/ and shows /p/.</u>
	Extension:	Do this exercise with several combinations.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.

R-8	Vowel Switch	
	Materials:	Lower case consonant letters (red) with vowels (either red or purple)
	Aim:	Auditory discrimination of vowel sounds Reading cvc words, Vowel reinforcement Preparation for spelling, reading
	Presentation:	This game must be played when the students have done some of the Reading Exercises. Teacher asks Student to make a word /tap/. <u>Student echoes and makes the word /tap/.</u> T: Now switch /tap/ to /tip/. <u>S: Echoes and switches /tap/ to /tip/.</u> T: Now switch /tip/ to /top/. <u>S: Echoes /top/ and switches /tip/ to /top/.</u> T: Switch /top/ to /tup/. <u>S: Echoes /tup/ and switches /top/ to /tup/.</u> T: Switch /tup/ to /tep/. <u>S: Echoes /tep/ and switches /tup/ to /tep/.</u>
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

4.1 Reading Exercises (RE)

The following Learning modules provide an array of words, nonsense words, multisyllabic words, phrases, sentences for students to read. Each reading page has base words, nonsense words, phrases, and sentences. Sight words have also been added to this group. Some common rules have been identified. These words provide vocabulary, comprehension, and fluency.

When students read the words, and sentences fluently, introduce them to the set of books called “Mac and Tab” series by EPS¹ or similar sets of your choice. They are written with ‘cvc’ and ‘vc’ words and with short stories that the children enjoy reading. There are 2 sets with 10 books in each set. This provides sufficient practice with vocabulary, comprehension, and fluency.

RE-1 **New introduction: m, t, a**

at

tam

am

tat

mat

mam

RE-2a

Review: m, t, a

New introduction: s, b, c

at

cat

mat

am

sat

tab

bat

*bass

cab

Nonsense Words:

ab

tam

sac

sab

mab

bab

****Rule: Base words ending in two consonants (ss),
represent just one sound.***

RE-2b: Phrases and Sentences

a cat

a bat

at a cab

*A cat sat.

Cam sat at a mat.

Sam bat at a bass.

**** Rule: When 'a' or 'A' stands alone, say /u/.***

***A sentence begins with a capital letter and ends in punctuation
(. ? !) and makes sense.***

RE-3a

Review: m, t, a, s, b, c

New introduction: n, l, i

in nil tin cat

it nit bin can

is lit inn cab

ill sit Miss Cal

Tim bit bill ant

Nonsense Words:

Lil nin min mib

**** Rule: The letter 'c' comes before the letter 'a'***
Capital letter: A person's name is always capitalized.

RE-3b

Sight Words: **is, has**

Phrases and Sentences

in a bit Can a cat sit?

in a can A cat bit a mat.

in a bin Sal lit a tin can!

A mitt is in a tin can.

Miss. Lim has a mat in a bin.

Sam can sit in a bin.

2 Syllable Words:

sat/in lac/tic lat/in

RE-4a

Review: m, t, a, s, b, c, n, l, i

New introduction: r, f, p

ill fin fat rap fan if

fill pin pat nap pan

pill nip rat ban fib

sap pit rip ran pal

fit tip sill sip Pam

Nonsense Words:

rin min lib nif ris

pim bip fap bif fal

RE-4b

Phrases & Sentences

a nap

rip in a fin

pill in a tin

Tip a fat cat.

A pal can rip a mat.

Cal can nap in a mat.

A rat bit a mitt.

Miss. Pam can fib!

Pat sat in a cab.

RE-4b

Can Tim sip sap?

Can a rat nip at a cat?

A rat can nap in a mill.

Fan a fat lip, Sam!

A cat sat in a lap.

Tan sap is in a pan.

2 Syllable Words:

cat/nip

fab/ric

cat/nap

rab/bit

RE-5a

Review: m, t, a, s, b, c, n, l, i, r, f, p

New introduction: h, g, o

on not hit mop big rob

ob got fit cop tag bog

od rot fig Bob hog log

hot rig sob gab bag

pig cob gap rap top

Nonsense Words:

mog gib mon gis fos

mof rin mas hib hom

**** Rule: The letter 'c' comes before letter 'o'; hence- 'c' before 'a' & 'o'***

RE-5b

Sight words: **the** **of**

Phrases & Sentences

in a pot Mom can jog.

a ham Ron can jog in the fog.

a big hat Rob has a big fan.

in a fog Can Pat tap a pan?

on a big log Tom can bat.

A fat hog bit a tin can.

The pig sat in a pit.

RE-5b

A tan lad ran at a pig.

The ham can fit in a pot.

A fat hog bit a tin can.

The pig sat in a pit.

The hat can fit in a gap.

A cat is on the rat!

2 Syllable Words:

cos/mic

pic/nic

man/tis

hag/gis

RE-6a

Review: m, t, a, s, b, c, n, l, i, r, f, p, h, g, o

New Introduction: k, d

kid did kiss dot gag Tod

kit dill dad dog dim god

Kim din dam doll din sob

kip bid dab pod dip cob

kin dig Dan cod gig got

Nonsense Words:

Lon beb hib hin tid

hod nin dop kib mig

****Rule: The letter 'k' comes before the letter 'i'; hence- 'k' before 'i'***

RE-6b

Sight words: for are to

Phrases & Sentences

a sad rat

Kim had a dog, Dot.

Kim's dog

Tod has a cob.

gag and sob

A kid hit Dan!

cod on Tod

Did Tod kiss Sis?

Dot had a pal, Kit.

Dan did tag a gal.

A sad rat had a fit.

RE-6b

A cat and rat nap in a tan hat.

A kid did dig a doll.

A rag had a rip in it.

Did Pam nab a big bass?

The cod is on the top.

Did Dan nag at a cat?

2 Syllable Words

ban/dit

cab/man

san/dal

RE-7a

Review: m, t, a, s, b, c, n, l, i, r, f, p, h, g, o, k, d

New introduction: j, x, e, v, z

jam tax van jog met six

Jan fix vim Jill set fizz

jag mix Jill sell leg jet

jig box tax hen zig gap

Jim keg fox pen zip fax

max pet zap sax Ken vat

Nonsense Words:

jix baj vix saz vip jif

jeb dex rez mej rif zif

RE-7b

Phrases & Sentences

a mad pet

Did Meg get mad at Jim?

a red hen

Set the keg on the box.

in a den

Can Liz zip the doll?

A mad lad had an ax.

Did dad fix the cod?

Jim met ten big men.

Jan met Jill at a pen.

Max can hem a bib.

Max did fib to the cop.

RE-7b

Jan will jab at the bass.

Dip a lip in a jam can.

A gap is in the box.

2 Syllable Words:

kid/nap

nap/kin

pal/lid

ras/cal

bas/ket

Rules:

***The letter 'k' comes before 'e' ; letter 'k' also comes before 'i';
hence - 'k' before 'e' and 'i'***

Floss Rule

***In a one syllable baseword, after one vowel,
the final 'f,l,s' = 'ff, ll, ss'***

RE-8a

Review: m, t, a, s, b, c, n, l, i, r, f, p, h, g, o, k, d, j, x, e, v, z

New Introduction: w, u, y, qu

This lass sat in the path.

a red lock

He had a big red lock.

to them

The man ran to them.

that rack

That rack had a lot of wigs.

2 Syllable Words

Chest/nut

bath/tub

cat/fish

5 Handwriting (HW)

Depending on the school district, either print or cursive are taught in various schools. To maintain consistency, whichever method is chosen, it is imperative that the sandpaper letters reflect the choice of the school. Sandpaper letters help to gain muscular memory of the shape of the letters. Using sand trays to practice will ignite multiple learning pathways in the brain.

The letters in the handwriting Learning modules have been grouped by the ease of production and similarity of the strokes. The sequence of movements for each letter is given. The teacher should be consistent with giving the directions for each letter. This aids the students' recall of the letters. The students name the letter while writing. This provides kinesthetic reinforcement.

Handwriting should be done under the supervision of a teacher. Teachers can set goals for each student or a group. With practice, students can achieve legibility and good handwriting skills.

Lessons that follow have been grouped as follows:

- Sub-section A: PRINT
- Sub-section B: CURSIVE

Sub-section A: Print

HW-1A	Fine Motor Skills	
	Materials:	scissors, push pins, carpet squares; Newspaper strips; scissors
	Aim:	Work on the fine motor skills; eye-hand coordination; develop the hand muscles; Indirect preparation for writing
	Presentation:	Make small tears of the newspaper strips using the thumb, index, and middle fingers. This helps with the development of fine motor skills. In the beginning scissors are used for cutting strips of paper. Then move on to the following lines. Start with straight lines to zigzag lines to spirals. Draw some simple shapes on a 5" 5" paper. Ask students to pin punch the shape. The students hold the push pin, and punch along the outline of the given shape. This exercise helps the students to refine their fine motor skills. The following exercises will help improve fine motor skills. Touching thumb to each finger exercise can be done every day; Drop and pick up the pencil with tripod grip several times; Move pennies/beads from palm to fingertips; Necklace making with straws; Coin sorting, stacking and polishing.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

HW-2A	Different Shapes	
	Materials:	Pipe cleaners in the shape of horizontal and vertical lines, up-down, full circle, half circle, diagonal, crisscross
	Aim:	To introduce the different shapes found in different letters Indirect preparation to reading, writing
	Presentation:	This is a very important prerequisite to handwriting. Teacher holds up each shape and asks the students to point to their shapes and echo the names. This is ' Horizontal ' This is ' Up-down ' This is ' Diagonal ' This is ' Criss-Cross ' (with 2 diagonals) This is ' Half circle ' This is ' Full Circle ' This is ' Camel Hump ' These are the strokes and curves used to make all the manuscript letters. Do a 3-period lesson with these strokes. Practice this for a few days in different ways.
	Extension:	Can be practiced with 'wikki stix' which the students can make on their own. The students can be encouraged to make these shapes with their bodies for variation. Use *' Frere Jacques ' nursery rhyme to sing the different shapes. Kids learn quickly through songs.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See example on next page

Handwriting Shape Song (HW-2A) (Sung to the tune of Frere Jacques)

Horizontal, Horizontal

Up-down, Up-down

Diagonal, Diagonal

Criss-cross; Criss-cross

Full circle, Full circle

Half circle, Half circle

Camel hump; camel hump

Helps to learn

The shapes of letters

HW-3A	Gross Motor Activities	
	Materials:	Chalk Board/Dry Erase Board Large paper, newsprint Chalk, Crayons, Paints
	Aim:	To work on the gross motor skills To feel the movement in the shoulder and arm and thus improve the kinesthetic memory
	Presentation:	These strokes can be practiced by using : 1. Large strokes in the air using straight arms 2. Long strokes on the chalk board/ Dry erase board 3. Wet sponge on chalk board 4. With finger paints 5. Large unlined paper with crayons 6. Wide lined paper
	Extension:	A sand tray can be used. A tray with shaving cream is another option.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

HW-4A	Drawing geometric shapes	
	Materials:	Geometric shape stencils
	Aim:	Aids in control of pencil Muscular movements to form distinct letters Work on the fine motor skills, eye-hand coordination Vocabulary development
	Presentation:	Have simple geometric shaped stencils. Begin with the simplest shape like a triangle or circle. T: Show and name the shape. S: echoes the name of the shape. T: Trace the shape with a crayon or chalk if using a chalk board. This shape can be colored in with up and down strokes. Students can repeat this lesson with many different shapes.
	Extension:	Introduce other shapes according to the unit involved.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

HW-5A	Good Posture & Correct Pencil Grip	
	Materials:	Chair with flat back Paper Pencil
	Aim:	To teach good posture which is very important for good handwriting
	Presentation:	<u>The 5 checkpoints for handwriting.</u> 1. Sit with seat pushed back in the chair and back straight and leaning forward. 2. Feet should rest flat on the floor. 3. Paper should be placed at a 45-degree angle. A trick is to turn under the bottom corner of the paper and to keep the resulting edge parallel to the edge of the table. 4. The non-dominant hand acts as the anchor hand and is used to hold the paper in place. 5. Pencil should be held so that it points by the shoulder. A proper pencil grip is very important. 5a. To do this, teacher says: Place: Students place the pencil on the desk with the lead pointing towards them. (NIP) Pinch: Students grasp the pencil with the index finger and thumb in a 'pinch' position where the paint begins. (FLIP) Lift: Lift the pencil as it falls in the correct position and rests on the first joint of the middle finger. Maintain constant pressure when holding the pencil. (GRIP) Practice this several times a day.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

HW-6A	Lines on Paper	
	Materials:	Lined paper and pencil
	Aim:	To teach the three lines on the lined paper
	Presentation:	Each student has a lined paper in front of him. Teacher introduces the three lines with a three-period lesson. <u>First period:</u> The teacher introduces the terminology <u>'Top Line'</u> and asks the students to trace the top line with the index finger from the dot to the end of the line. Next, teach that the middle line is called, <u>'Midline'</u>. Ask the students to trace from the dot to the end of the line. Finally, teach that the bottom line is called, <u>'Base Line'</u>. Ask the students to trace from the dot to the end of the line. This must be reinforced every day before the start of handwriting practice. <u>Second period:</u> The teacher says, <u>'show me'</u> the top line, the midline, and the base lines. <u>Third period:</u> The teacher points to the base, mid, top lines and asks the student, <u>'what is this?'</u>
	Extension:	The above can be done on a board with dry erase markers or 'Wikki Stix'.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes:	

HW-7A	Tall, Short, and Down Letters	
	Materials:	Lined paper Lower Case Plastic letters
	Aim:	To teach the different sizes of letters
	Presentation:	Bring the lower-case plastic letters to the table. Teacher places the lined paper and the letters on the table. Tell the students that there are different sizes of letters. Let us see how they fit on this lined paper. <u>Tall Letters</u> Take the letter ‘t’ and ask them to name it. Place it on the lined paper. Now show how it touches the top line. Say that ‘t’ is a tall letter because it <u>touches the top line</u>. Ask the students to pick up all the other tall letters while naming and placing them on the lined paper. Motion - <u>Thumbs Up</u>. Do a similar presentation as above for the Short and Under letters. <u>Short letters</u> Short letters touch the midline. Motion - <u>Closed Fist</u>. <u>Down letters</u> Down letters start at the midline and go down below the baseline. Motion - <u>Thumbs Down</u>.
	Extension:	Practice, practice, practice
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes:	

HW-8A	Beginning Strokes	
	Materials:	Unlined paper or dry erase board or chalk board
	Aim:	To introduce the different strokes involved in the print letters Preparation for writing
	Presentation:	Notes to the Teacher Practice one stroke per day. Each stroke is practiced for a few days before moving on to the next stroke. Repeat this process multiple times. Using large whole arm movements help improve kinesthetic memory. Teacher shows how to make: 1. Up and down strokes 2. Down and up strokes 3. Circle strokes 4. Half circle strokes 5. Diagonal strokes 6. Hump strokes
	Extension:	The students like drawing with different mediums. Include chalk, crayons, markers, etc.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

HW-9A	Drawing the Strokes	
	Materials:	Wide lined paper and pencil
	Aim:	To teach the different lines for writing on the lined paper
	Presentation:	After several practices with chalk board, unlined paper students are ready to start with wide lined paper practice. Tell the students that lower case print letters start from the top. Before touching the pencil, students skywrite each shape. Each stroke must be introduced one day at a time. Before introducing the next stroke, review the previous stroke. If the student is ready, introduce the next stroke. Ask students to draw: 1. Short horizontal stroke on midline 2. Tall up-down (vertical) stroke from topline to baseline 3. Short up-down (vertical) stroke from midline to baseline 4. Down letters from midline to below the baseline 5. Half circles at the midline 6. Full circles at the midline 7. Camel humps at the midline This lesson will go on for several days before the writing of letters.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

HW-10A	Letter Forms and Groups	
	Materials:	Wide-lined paper, pencil *Stroke description paper
	Aim:	To teach the letters grouped by similar strokes Preparation for writing
	Presentation:	Group the letters that are simplest to write. This is a sample group. You may follow whichever suits you. l, t, i h, m, n, u, y b, p, o, s a, c, d, e, g, q r, f, j v, w, x, k, z While giving the mantra for each letter, follow the (horizontal, vertical, half circle, etc.) terminologies taught earlier. Students should repeat as they write. Remind the students that these lower-case letters will start at the top. For example: letter 'b' - 'down, up, and around'; letter 'm' - 'down, up-down, up-down.' While writing on paper, teacher traces a letter first with the mantra. Student traces the letter three times; makes a copy next to it. Now he/she will make a copy from memory (TCM). Students only write the same letter about 5 times and move on to the next.
	Extension:	Once the introduction is done, the next day each of the previously presented letters can be done by skywriting first and then on paper. Repeat as many times as needed.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See description on next page

Handwriting Stroke Description (HW-10A)

<u>Name</u>	<u>description</u>	<u>tall/short/under letters</u>
a	half-circle, up, down	*short
b	down, up, half circle	*tall
c	half-circle	short
d	half-circle, up to top, down to baseline	tall
e	horizontal, half-circle	short
f	hook, down & cross	tall
g	half-circle, up, down below, hook left	*down
h	down, up & hump	tall
i	down, dot	short
j	down below, hook left, dot	down
k	down, diagonal in, diagonal out	tall
l	down	tall
m	down, up & hump1, hump 2	short
n	down, up & 1 hump	short

***Tall:** goes from the top line to base line – **Thumbs up**

***Short:** goes from mid-line to base line – **Closed fist**

***Down:** starts from mid-line and goes under the base line – **Thumbs down**

<u>Name</u>	<u>description</u>	<u>tall/short/under letters</u>
o	full circle	short
p	down below, up, around	down
q	half-circle, up, down below, hook right	down
r	down, up, hook right	short
s	hook, diagonal, hook	short
t	down, cross	tall
u	down, curve up, down	short
v	diagonal down, diagonal up	short
w	diagonals - down, up, down, up	short
x	crisscross	short
y	down, curve up, down below	down
z	horizontal, diagonal, horizontal	short

*Tall: goes from the top line to base line – Thumbs up

*Short: goes from mid-line to base line – Closed fist

*Down: starts from mid-line and goes below the base line – Thumbs down

HW-11A	Practice, Practice, Practice	
	Materials:	Wide-lined paper, pencil
	Aim:	To practice all the Lower Case and Upper-Case letters Preparation for writing
	Presentation:	Give the students a journal. Give each student a written sample of upper and lower-case letters. In the beginning students must write lower case letters only following the lines in the journal. After they master the lower-case letters, they can move on to the upper-case letters. After they master the upper-case letters, they can write upper and lower-case letters together. This can go on until they are ready to spell words and sentences.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

Subsection B: Cursive

Why cursive?

Cursive letters eliminate the need to decide where to begin to write each letter and in which direction you must proceed. It also provides directional left-to-right energy and emphasis on spatial letter sequence. Cursive reduces the inclination to reverse direction by eliminating the need to raise the writing instrument between letters in a word. It provides unique letter shapes which are NOT mirror images of other letters. Finally, cursive writing helps to promote flowing, rhythmical movements which the student can execute more easily than the short, stilted lines and arcs of manuscript printing.

HW-1B	Pre-writing skills	
	Materials:	scissors, push pins Carpet squares Newspaper strips Scissors
	Aim:	Work on the fine motor skills Eye-hand coordination Develop the hand muscles Indirect preparation for writing
	Presentation:	Make small tears of the newspaper strips using the thumb, index, and middle fingers. This helps with the development of fine motor skills. In the beginning scissors are used for cutting strips of paper. Then move on to the following lines. Start with straight lines to zigzag lines to spirals. Draw some simple shapes on a 5" 5" paper. Ask students to pin punch the shape. The students hold the push pin, and punch along the outline of the given shape. This exercise helps the students to refine their fine motor skills. The following exercises will help improve fine motor skills. Touching thumb to each finger exercise can be done every day. Drop and pick up the pencil with tripod grip several times.
	Extension:	Introduce other shapes according to the unit involved.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

HW-2B	Different Strokes	
	Materials:	Pipe cleaners in the shape of long swing up; short swing up and push up over
	Aim:	To introduce the different strokes involved in the cursive letters; preparation for writing
	Presentation:	This is a very important prerequisite to handwriting. Teacher holds up each shape and asks the students to point to their shapes and echo the names. This is 'Long swing up' This is 'Short swing up' This is 'Push up over.' These are the strokes used to make all the cursive letters. Do a 3-Period lesson with these strokes. Practice this for a few days in different ways.
	Extension:	Can be practiced with 'Wikki Stix' which the students can make on their own. Use 'twinkle-twinkle little star' nursery rhyme to sing the different shapes. Kids learn quickly through songs.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

Strokes Song: (HW-2B)

(Sung to the tune of ‘twinkle twinkle little star’)

Long swing up, and short swing up

Push up over are all the strokes

These are all the strokes you learn

When you learn to write cursive

Long swing up, and short swing up

Push up over are all the strokes

(Make appropriate hand movements for the strokes.)

HW-3B	Gross Motor Activities	
	Materials:	Chalk board; dry erase board; large paper, newsprint, chalk
	Aim:	To work on the gross motor skills; to feel the movement in the shoulder and arm and thus improve the kinesthetic memory.
	Presentation:	These strokes can be practiced by using : 1. Large strokes in the air using straight arms 2. Long strokes on the chalk board/ Dry erase board 3. Wet sponge on chalk board 4. With finger paints 5. Large unlined paper with crayons 6. Wide lined paper with pencils
	Extension:	Students can use different mediums like crayons, markers, chalk, etc.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

HW-4B	Drawing geometric shapes	
	Materials:	Geometric shape stencils
	Aim:	Aids in control of pencil Muscular movements to forming distinct letters Work on the fine motor skills Eye-hand coordination Vocabulary development
	Presentation:	Have simple geometric shaped stencils. Begin with the simplest shape like a triangle or circle. T: Show and name the shape. S: echoes the name of the shape. T: Trace the shape with a crayon or chalk if using a chalk board. This shape can be colored in with up and down strokes. Students can repeat this lesson with many different shapes.
	Extension:	Introduce other shapes according to the unit involved.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

HW-5B	Good Posture & Correct Pencil Grip	
	Materials:	Chair with flat back, paper, pencil
	Aim:	To teach good posture which is very important for good handwriting
	Presentation:	<u>The five checkpoints for handwriting.</u> 1. Sit with seat pushed back in the chair and back straight and leaning forward. 2. Feet should rest flat on the floor. 3. Paper should be at a 45-degree angle. 4. The non-dominant hand acts as the anchor hand and is used to hold the paper in place. 5. A pencil should be held so that it points over the shoulder. A proper pencil grip is very important. 5a. To do this, teacher says: Place: Students place pencils on the desk with the point towards them. Pinch: Students grasp the pencil with the index finger and thumb in a 'pinch' position where paint begins. Lift: Lift the pencil as it falls in the correct position and rests on the first joint of the middle finger. Maintain constant pressure when holding the pencil. Practice this several times a day.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

HW-6B	Lines on Paper	
	Materials:	Lined paper and pencil
	Aim:	To teach the three lines on the lined paper
	Presentation:	Each student has a lined paper in front of him. Teacher introduces the three lines with a 3-Period lesson. <u>First period:</u> The teacher introduces the terminology 'Top Line' and asks the student to trace the top line with his index finger from the dot to the end of the line. Next, teach that the middle line is called, 'Midline'. Ask the student to trace from the dot to the end of the line. Finally, teach that the bottom line is called, 'Base Line'. Ask the student to trace it from the dot to the end of the line. This will be reinforced every day before the start of handwriting practice. <u>Second period:</u> Now the teacher says, 'show me' the top line, the midline, and the base lines on the paper. <u>Third period:</u> Finally, the teacher points to the base, mid, top lines and asks the student, 'what is this?'
	Extension:	The above can be done on the board with dry erase markers or on paper with 'Wikki Stix' and the students follow the same procedure as above.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

HW-7B	Beginning Strokes	
	Materials:	Sand tray Finger paint Chalk board/ dry erase board Unlined paper
	Aim:	To introduce the different strokes involved in the cursive letters Preparation for writing
	Presentation:	Notes to the Teacher Practice one stroke per day. Each stroke is practiced for a few days before moving on to the next stroke. Repeat this process multiple times. Use whole arm . These large full arm movements help improve kinesthetic memory. Teacher shows the following strokes: 1. Windshield wiper strokes 2. Continuous push up over strokes 3. Continuous long swing up strokes 4. Continuous over and under strokes 5. Continuous under and over strokes
	Extension:	The students like drawing with different mediums. Include chalk, crayons, markers, shaving cream, etc.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

HW-8B	Practicing the Strokes	
	Materials:	Chalk board/Dry erase board Sand tray Wide lined paper and pencil
	Aim:	To teach the different strokes for writing on the lined paper
	Presentation:	T: Today we will practice the cursive strokes. Lower case cursive always starts from the baseline. Draw an arrow on the baseline to indicate where each stroke will start. T: There are different sizes of letters. Tall , Short, and Under letters. T: Shows how ‘Tall’ letters start at the baseline and touch the top line-Long swing up letters- Long swing up stroke Motion for ‘Tall’ letters- thumbs up. T: Shows how ‘Short’ letters start at the baseline and touch the midline - Short swing up or ‘Push up over’ letters. Motion for Short letters – short with index and thumb. T: Shows how ‘Down’ letters start at the baseline and can either be short swing up or push up over and go up to the midline and then go down below the baseline. Motion for Down letters – thumbs down Do a 3-Period Lesson. These strokes must be practiced one stroke per day. If the student shows mastery, move on to the next stroke.
	Extension:	Lots of practice is required for each letter.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

HW-9B	Letter Forms and Groups	
	Materials:	Wide-lined paper, pencil
	Aim:	To teach the letters grouped by similar strokes
	Presentation:	Group the letters by strokes. Push up over strokes: a, c, d, g, m, n, q, o, v, x, y, z Long swing up strokes: b, f, h, k, l, t Short swing up strokes: e, i, j, p, r, s, u, w While giving the mantra for each letter, follow the (long swing up; short swing up; push up over) terminologies taught earlier. Students should repeat as they write. Also remind the students that the lower-case cursive letters start at the base line. For example: Letter 'b' is 'long swing up, make a loop to the left, come straight down to the base line, curve up to the midline and swing out'; Letter 'm' is 'push up over and down; repeat two times and swing out.' Ideally only two three letters from the same stroke should be introduced. Review these the next day by skywriting and then on paper and introduce two or three more.
	Extension:	Repeat as many times as needed.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

Handwriting Stroke Description (HW-9B)

Name	description	tall/short/under letters
a	push up over to the **2 o'clock dot, stop, come around and close, come straight down and swing out	short
b	long swing up, make a loop to the left, come straight down, curve up to the mid-line and swing out	*tall
c	push up over to the 2 o'clock dot, stop, come around, swing out	short
d	push up over to the 2 o'clock dot, stop, come around, go up to the top line, come down, swing out	tall
e	short swing up, loop to left, come down, swing out	short
f	long swing up, loop to the left, come down below the baseline, loop to right, swing out	tall
g	push up over to the 2 o'clock dot, stop, come around and close, come straight down below the baseline, loop to left and swing out	*down
h	long swing up, loop to the left, come down to base line, stop, make a hump, swing out	tall

**2 o'clock dot refers to the location of 2 o'clock hour on a circular clock.

*Tall: goes from the base line to top line.

*Short: goes from base line to mid-line.

*Down: starts from base line to mid-line and goes under the base line.

Name	description	tall/short/under letters
i	short swing up to mid-line, come straight down swing out	short
j	short swing up to mid-line, come straight down below the base line, loop to left, swing out	down
k	long swing up, loop to the left, come down to base line, stop, back up to mid line, circle around, kick in, kick out	tall
l	long swing up, loop to the left, come down to base line, stop, swing out	tall
m	push up over to the mid-line, come down, make two more humps, swing out	short
n	push up over to the mid-line, come down, make one more humps, swing out	short
o	push up over to the mid-line to the 2 o'clock dot, come around, close and swing out	short
p	short swing up, come straight down below the base line, come back up, circle around, swing out	down
q	push up over to the 2 o'clock dot, stop, come around and close, come straight down below the baseline, loop to right and swing out	dowm

*Tall: goes from the base line to top line.

*Short: goes from base line to midline.

*Down: starts from base line to mid-line and goes below the base line.

Name	description	tall/short/under letters
r	short swing up to mid-line just above the mid-line, draw a horizontal line, come down to base line, swing out	short
s	short swing up to mid-line, come straight down to base line, curve up to close, swing out	short
t	long swing up to top line, come straight down to the base line, stop, swing out, cross	tall
u	short swing up to mid-line, come straight down to base line, curve up to the mid-line, come down to base line, swing out	short
v	push up over to mid-line, come down in a slant to base line, go up to the mid-line, swing out	short
w	short swing up to mid-line, come straight down to base line, curve up to mid-line, come down to base line, curve up to mid-line, swing out	short
x	push up over to mid-line, slant and come down to base line, swing out, cross	short
y	push up over to mid-line, come straight down to base line, curve up to mid-line, come straight down below base line, loop to left, swing out	down
z	push up over to mid-line, come down to base line, go up slightly above the mid-line, pull down to base line, loop to the left, swing out	short

*Tall: goes from the base line to top line.

*Short: goes from base line to mid-line.

*Down: starts from base line to mid-line and goes below the base line.

HW-10B	Practice, Practice, Practice	
	Materials:	Wide-lined paper, pencil
	Aim:	To practice all the Lower Case and Upper-Case letters; preparation for writing
	Presentation:	Give the students a journal. Give each student a written sample of upper and lower-case letters. In the beginning students must write lower case letters only following the lines in the journal. After they master the lower-case letters, they can move on to the upper-case letters. After they master the upper-case letters, they can write upper and lower-case letters together. This can go on until they are ready to spell words and sentences.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

6 Spelling (S)

Spelling moves from sounds to letters. Learning to spell enhances the student's reading and writing. The sound to letter recognition is a key component of spelling.

The Learning modules in this section address the following:

Three spelling procedures, i.e.

1. Listen to the sounds
2. Finger Tapping
3. Sound out
4. Procedures to write phrases and sentences
5. Procedures to write multisyllabic words

Please note that all the words used for spelling are ***Closed syllables***. When a vowel is followed by one or more consonants, it makes a Closed syllable. For example: **cat, pig, bland, jump**

S-1	Listen to the Sounds	
	Materials:	Paper and pencil
	Aim:	Auditory reinforcements Preparation for writing words, phrases, sentences on paper
	Presentation:	After about 4-5 sounds have been introduced the teacher can start giving two letter words to become familiar with the procedures. Once the students master this procedure move on to SP-3 procedure. This procedure can be dropped. T: Look at my mouth and echo the sound Teacher gives one sound at a time to the student. For example: the word is /ox/ T: Say the sound as you write /o/. S: Echoes the sound /o/ sounding out as he writes it. (Student must have eye contact with the teacher when the sound is dictated.) S: Looks up at the teacher and waits for the next sound. T: Dictates /x/ S: Writes /x/ while sounding the letter. Student will now read the word /ox/.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

S-2	Finger Tapping	
	Materials:	Paper and pencil
	Aim:	Kinesthetic reinforcement of spelling words Preparation for spelling sentences and stories To sound spell VC and CVC words on paper.
	Presentation:	T: Look at my mouth and echo the word /am/ S: Echoes /am/ T: Using the non-dominant hand, tap each sound at your fingertips to your thumb starting with the pinky. S: taps /a/ with pinky and /m/ with ringer while saying the sounds. T: Say the word. S: /am/ T: Now sound as you write the word. S: /a/ /m/ T: Read the word. S: /am/ If a student is left-handed, use the right hand for tapping starting from the thumb. This is a very kinesthetic reinforcement of spelling. Reading what is written is critical for student to develop as it leads to accurate proof-reading habits. Correcting errors by proof-reading should be encouraged.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes:	

S-3	Sound Out	
	Materials:	Paper and pencil
	Aim:	Auditory reinforcement Preparation for writing sentences and stories To sound spell VC and CVC words on paper
	Presentation:	The final goal for each student is to master this procedure and use it for all writing. T: Look at my mouth and echo the word /am/ S: Echoes /am/ T: Now sound out as you write the word /am/. S: /a/ /m/ T: Read the word. S: /am/ Reading what is written is critical for student to develop as it leads to accurate proof-reading habits. Correcting errors by proof-reading should be encouraged.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

S-4a	What are Phrases and Sentences?	
	Materials:	Paper and pencil
	Aim:	Understanding of phrases and sentences Preparation for reading, writing
	Presentation:	Phrases are two or more words that do not contain the subject-predicate to communicate a complete thought. A Phrase is incomplete on its own. A phrase can be short or long. A Phrase does not begin with a capital letter or end in punctuation. An example: on the bed A Sentence is a group of words that are put together to mean something. It expresses a complete thought. Teach sentence motion to the S. A Sentence always begins with a capital letter and ends in punctuation depending upon the sentence. An example: A cat sat on the bed.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

S-4b	Writing Phrases and Sentences	
	Materials:	Paper and pencil Small cubes represent words
	Aim:	Auditory, visual, and kinesthetic reinforcements To sound spell phrases and sentences on paper
	Presentation:	There are various ways to do this exercise. One way is to use small cubes for each word. Another way is to use your whole arm and tap each word on the arm. Students can tap on the desk with their hands. T: Look at my mouth and echo the phrase: on a pig with three different intonations. S: Echoes 'on a pig'. T: Place small cubes for each word as you say the phrase again. S: Places cubes for each word. T: Point to each cube, write the words. S: Points to each cube, writes 'on a pig'. T: Read what you have written. S: Reads the whole phrase. For spacers, use one finger space or a popsicle stick. The same procedure is also applied to writing sentences. The only difference will be to start with a capital letter and end in a punctuation.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

S-5	Multi Syllables	
	Materials:	Paper and pencil; rectangular foams represent syllables
	Aim:	Auditory reinforcement for spelling two or more syllables on paper
	Presentation:	This procedure can be done with foams or head bobbing or using arms or hands. T: Say the word slowly but naturally Then pronounce each syllable for /catnip/. S: Echoes the syllable /catnip/. T: Place a felt to represent each syllable. S: Places the two rectangular foams for each syllable as he says the syllable /cat/ /nip/. T: Point to the foam and say the first syllable and sound spell it. S: Points to the left most foam and says /cat/. S: He writes the syllable /cat/ while sounding it out on paper. T: Repeat the same for the second syllable. S: After both the syllables are written, the student reads the whole syllable, 'catnip'.
	Extension:	None
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

6.1 Spelling Exercises (SE)

Learning modules in this section help students to practice spelling of words and sentences. The procedures described in Section 6 are used in these modules.

Note: Before proceeding with the spelling exercises in these learning modules, students must have completed the reading and handwriting phases of the sounds.

SE - 1

Presented sounds: m, t, a

Listen to the Sounds: am, at

Finger Tapping: mat, tat

Sound Out:

Phrases:

Sentences:

2 Syllable Words:

SE - 2

Presented sounds: m, t, a, s, b, c

Listen to the Sounds: am, bat, sat

Finger-tapping: at, ab, cab, cas, mat, sat

Sound Out: tab, Sam

Phrases: as a cat

Sentences: A cat sat.

2 Syllable Words:

****Rule: When 'a' or 'A' stands alone, say /u/.***

****A sentence begins with a capital letter, ends in a punctuation (. ? !) and is a complete thought.***

SE - 3

Presented sounds: m, t, a, s, b, c, n, l, i

Listen to the Sounds: nit, bin, can

Finger Tapping: in, it, tin, tin, mat, bit, man

Sound Out: nil, nit, lit, cab, sit, bib

Phrases: cat in a tin, in a bit

Sentences: A cat can sit in a bin.
Sam can sit.

2 Syllable Words: sat/in; lac/tic; lat/in

***Rule:** *The letter 'c' comes before the letter 'a'; hence 'C' before 'a'*

SE - 4

Presented sounds: m, t, a, s, b, c, n, l, i, r, f, p

Listen to the Sounds: an, am, can

Finger Tapping: if, fat, rap, sip, lap

Sound Out: pal, fib, pan, sap, cab, lap

Phrases: sap in a cab, nap in a lap

Sentences: Is Tim in a cab?
A rat bit a cat!

2 Syllable Words: cat/nip, cat/nap; fab/ric; rab/bit

****Rule: Capitalize a person's name.***

SE - 5

Presented sounds: m, t, a, s, b, c, n, l, i, r, f, p, **h, g, o**

Listen to the Sounds: in, fog, ham

Finger Tapping: on, jog, pit, pot, hat, big

Sound Out: got, cop, bag, tap, ran, log

Phrases: in the fog, a bit of ham

Sentences: Mom can jog in the fog.
Rob had a big fat bit of ham.

2 Syllable Words: man/tis; hag/gis; pic/nic; cos/mic

Sight Words: of, the

*** Rule:** *The letter 'c' comes before the letter 'o'; hence 'c' before 'a' and 'o'*

SE - 6

Presented sounds: m, t, a, s, b, c, n, l, i, r, f, p, h, g, o, k, d

Listen to the Sounds: dab, dim, kin

Finger Tapping: kit, sob, cob, dog, gag, pod

Sound Out: dig, bid, pig, dip, cob, Kim

Phrases: big fat cod, top of the rod
in the dim cab, on the log

Sentences: The fat cod is on the big log.
The dog is on top of the rod.

2 Syllable Words: ban/dit; cab/man; san/dal; dal/las

Sight words: for are to

*** Rule:** The letter 'k' comes before the letter 'i'; hence 'k' before 'i'

SE - 7

Presented sounds: m, t, a, s, b, c, n, l, i, r, f, p, h, g, o, k, d,
j, x, e, v, z

Listen to the Sounds: zax, fix, jag

Finger Tapping: jam, six, sox, box, keg, tax, hen

Sound Out: vim, jet, zip, beg, zap, fox

Phrases: jam for a pet , a red keg for a fox
men in a jet

Sentences: Jim met six big men in a jet.
Fix a pen for a red hen.

2 Syllable Words: kid/nap; nap/kin; pal/lid; ras/cal;
bas/ket

Sight Words: the, of, to, for, are

**** Rule: The letter 'k' comes before 'e'; hence 'k' before 'e' and 'i'***

SE - 8

Presented sounds: m, t, a, s, b, c, n, l, i, r, f, p, h, g, o, k, d, j, x, e, v, z
w, u, y, qu

Listen to the Sounds: cut, pug, quip

Finger Tapping: web, yam, quit, win, sub, web

Sound Out: yak, rat, bet, rug, cub, fun

Phrases: in a hut, cut rug for a cub

Sentences: Del hid in a nut in a hut.
Bud can wag a fig at a red yak.

2 Syllable Words: vix/en, ban/yan; tid/bit

Sight Words: the, of, are, you

*** Rule: The letter 'c' comes before 'u', 'c' before 'a', 'o' and 'u'**

SE - 9

Presented sounds: ch, ck, sh, th, th, qu

Listen to the Sounds: chop; lick; thus; then; shag

Finger Tapping: chum; back; thin; shock; than

Sound Out: quick; pith; that; cash; munch

Phrases: chop a log;
lot of cash;
thick ham
to this

Sentences: Will you come to this hut?
A moth sat on a red rock.
The big ship sat at the dock.
The quick fox ran to get the dog.

2 Syllable Words: chest/nut; bath/tub; cat/fish

Sight Words: come

7 Vocabulary, Comprehension and Fluency (VCF)

Use of varied vocabulary by teachers challenges students to think and stimulate their curiosity and imagination.

Comprehension is understanding what is read. It is dependent on word recognition, vocabulary, and fluency.

Learning modules in this section provide various methods for developing and improving vocabulary and comprehension skills of the students.

Fluency is the ability to read a text accurately, automatically, and with prosody. It is important because it provides a bridge between decoding and comprehension.

The three important aspects of fluency are:

1. Accuracy – minimizing errors made while reading aloud.
2. Reading speed or rate - the words per minute read aloud.
3. Prosody – involves intonation, tone, stress, and rhythm.

There are several ways to achieve fluency in reading. Some of the examples are cited in the Learning modules included in this section.

VCF-1	Multiple Meanings	
	Materials:	*Multiple meaning words printed on cards Pictures of words (Moose Materials) with the same spelling but different meanings.
	Aim:	To help children when reading words in context, draw on their knowledge of words, which in turn expands word recognition and flexibility of meaning.
	Presentation:	The teacher gives the word 'jam' to the students. Ask the students to tell different meanings or uses of the word. For example: Jam: a kind of jam Traffic jam Jammed in a small place Jamming of a machine Jam with musical instruments If possible, show them the pictures of additional meanings. The teacher makes up a sentence using the words. Students choose the picture with the matching meaning.
	Extension:	Students can play games with *multiple meaning cards. Two students can play this game. Students can sort pictures into groups once several words have been introduced.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

* See examples on next page

Multiple Meanings* - (VCF-1)

Bat	bit	tug
Fan	pin	gum
Pan	rip	pen
Jam	dip	miss
Ram	tip	well
Cap	pit	will
Lap	bill	tick
Tag	net	check
Pad	cut	neck
Pass	run	box
Mass	nut	can

* As taken from The Reading Teacher's Book of Lists by E B Fry and Moose Materials

VCF-2	Word of the Day	
	Materials:	List of words to be introduced.
	Aim:	To increase the student's vocabulary.
	Presentation:	Write the Word of the Day on the board. Discuss the meaning of the word with the children. Use the word in a sentence. Ask a student to come up with a sentence as well. Have them keep a ring of 3x5 index cards in their desk to use in their writing. Or students can write word of the day in their journals.
	Extension:	Get a big jar or box that is marked "Word of the DAY". As the words are introduced in class write the new word on a piece of paper and put it in the jar/box. Review them periodically with the students. Let a student pull a slip out and read the word and have the class discuss the word.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

VCF-3	Other Vocabulary builders	
	Materials:	List of other vocabulary builders: Prefixes; Suffixes; Synonyms; Antonyms
	Aim:	To increase the student's vocabulary.
	Presentation:	Common prefixes, suffixes, synonyms, and antonyms could be introduced at this stage as and when required. *Some examples are provided on the next page. Discuss the meaning of these. Write it on cards and review every week. Use the word in a sentence. Ask a student to come up with a sentence.
	Extension:	Get a big jar or box that is marked "Prefix/suffix/synonyms/antonyms." As these are introduced in class write it on a piece of paper and put it in the jar/box. Review them periodically. Let a student pull a slip out and give it to the teacher and have the class discuss the meaning.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

* See examples on next page

Examples of Vocabulary Builders (VCF-3)

<u>Prefixes List</u>	<u>Suffixes</u>	<u>Synonyms</u>	<u>Antonyms</u>
Un	s, es	add	above
In	ed	back	add
Dis	ing	ask	back
Non	less	boy	bad
Mis	able	girl	before
Sub	ful	call	big
Mid		fix	buy
Re		end	break
Pre		ill	cheap
Super		job	clean
Under		sell	cold
Anti		leave	cool
Multi		look	true
Post		keep	fast
Pro		listen	finish
Uni		make	over
Bi		old	happy
Tri		right	huge
Quadr		say	inside
Pent		take	left
Centi		vast	play
Milli		walk	rear
Semi		world	stop

VCF-4	Reading a Book	
	Materials:	A story book
	Aim:	To introduce the children to new words.
	Presentation:	The teacher shows the class the cover of the picture book that is chosen. Discuss with the students what they think the story might be about. Read the story to the students. After reading, choose some of the words the students might not be familiar with and talk about the meaning of the words. This exercise helps the students expand their vocabulary.
	Extension:	Continue with a variety of books on different topics.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson as necessary.
	Notes	

VCF-5	Read Diary of a Wombat	
	Materials:	Diary of a Wombat by Jackie French. Make a list of words that may be unfamiliar to the students. Then group them according to specific areas of the story. For example, Setting: Australia, hole Characters: creature, humans, wombat Problem: reward, invading, trained, boring Events: battle, dust bath Ending: trained, slept
	Aim:	To introduce students to a new set of vocabulary words.
	Presentation:	Read "Diary of a Wombat". Discuss the story with the students. Bring into the discussion the setting of the story, the characters, the problem, the events, and the ending. Write words on the board that the students come up with that are new to them. At some point include the words you have on your list if the students do not mention them. Help the students place the new words into the different areas of the story that you have discussed. For example, the setting would include the words Australia and hole.
	Extension:	Use some of the new words in conversation during class time. Verbally review the new words with reading groups. Words can be put on cards and made into a matching game or a memory game. Read other books using same procedure.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

VCF-6	The Five Ws & How- Comprehension	
	Materials:	Sentences
	Aim:	To help students develop identifying the questions - 5Ws (what, when, where, why, who) and how of sentences
	Presentation:	Prerequisite for this activity is that the student must be able to repeat 5-7 word sentences. Begin with bare bone (2-3 word) sentences and slowly add up to 7-8 words. T: Echo the sentence after me. T: Jack ran. S: Echo sentence. T: Who ran? S: Jack T: What did Jack do? S: Jack ran. In the next sentence, add 'when, where, why' questions adding one or two concepts each day. T: Jack ran to the pool in the morning. S: echo T: Where did Jack run? S: Jack ran to the pool. T: When did Jack run to the pool? S: Jack ran to the pool in the morning. T: Echo, Jack ran quickly. S: Echo T: How did Jack run? S: Jack ran quickly.
	Extension:	Teachers can practice where, when, phrases before introducing these sentences. When phrases: Yesterday, tomorrow, today night, morning, afternoon; ; after, before, etc. Where phrases: at the store; in the house, on the bench, etc.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

VCF-7	Comprehension Skills	
	Materials:	A book
	Aim:	To help students refine understanding of the parts of a story
	Presentation:	Read a book. The teacher can discuss the following: What outcomes can you predict? What is the problem in the story? Can you identify the details? What is the sequence of the story? Describe a character. What words describe his/her feelings? What is the ending of the story? Did feelings change from beginning to end? How do you summarize the story? Cause/Effect or Fact/Opinion? Can you compare and contrast? What is the mood of the story? Where does it take place? Can you give some real-life examples? Students can act out the story. Students can tell the story in their own words. Discuss the multiple meanings. They can draw pictures for the story.
	Extension:	1. Read other books with or without words. 2. Some of these ideas that are used in most of the stories can be drawn and placed on a poster board. For e.g., pictures of a house, sky/tree to indicate outside, a boy, a girl, numbers to indicate the sequence, etc.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes:	

VCF-8	Comprehension Dice Game	
	Materials:	A book A dice that has the words: character, setting, problem, events, beginning; ending, predicting outcome
	Aim:	To help students refine understanding of the parts of a story
	Presentation:	Read a book. A student can roll the dice and the teacher tells the class what to answer. The students discuss the area of the story that was rolled.
	Extension:	Read other books with or without words. In the beginning read short passages ideal for the younger students and slowly move on to story books.
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

VCF-9	Developing Fluency	
	Materials:	A book
	Aim:	To help students develop fluency
	Presentation:	Some methods to help with fluency are: Teachers model how to read Students reread loud the same Students can read to partners Give students book on tape Students can record themselves reading Time the students and note accuracy and speed; note improvement by re-reading Have students pretend to be tv/radio announcers Teach proper punctuation Practice Sight words reading by using games or flash cards Poetry reciting, singing songs Select words, sentences, short paragraphs, passages, short stories to match student's ability level. Fluency record keeping will help in improving speed and accuracy. Practice reading fluency every day for about five minutes.
	Extension:	
	Summary:	Note how students are doing and take notes for future repetitions of this lesson.
	Notes	

Appendix 1: Lesson Planning

Lesson plans consist of combinations of learning modules described in the main text. The daily plan should include:

Phonological awareness: 2 modules done daily (examples given below in the sample daily lesson plan)

Alphabet: Done daily from the beginning

Phonics: Starts after Phonemic awareness

Letter Review: Each day, show keywords and sound cards and ask the students to say them. Review all the letters covered so far.

Sound Review: Each day, give a sound, ask students to write the letter by echoing the sound and naming the letter after writing. This is done for all the sounds presented so far.

Reading & Vocabulary: Starts when student is ready to read. Vocabulary done from the reading words and Word of the day

Handwriting: Done daily from the beginning

Spelling: Starts after reading begins

Comprehension: Done daily from the beginning

It is recommended that a monthly lesson plan be prepared. The monthly lesson plan is helpful in creating a daily plan.

Examples of monthly lesson plans are provided in the sheets that follow. Templates of daily lesson plans are also given. Sample daily plans based on these templates for selected days (e.g., day 10 of each month for the first two months) that track the monthly plans are also provided.

Note that these are just sample plans, and the actual plans may differ since they will depend on the progress made by students in the class.

Appendix 4: Materials List

General:

scissors;
glue stick

Listening Skills:

musical instruments (rhythm sticks, maracas, tambourine),
bell, whistle, rattle, sandpaper pieces, blocks

Rhyming:

Musical instruments;
3 circle and 1 triangle card;
5-6 red construction paper squares;
5 different color construction paper squares;
Bean bag/ball;
rhyme pictures;
9-square template,
rhyming pictures;
deck of rhyming cards

Words & Sentences:

Pictures for compound words (optional);
10 cubes (cubes represent words);
2 Bingo Cards

Syllables:

6 Rectangular colored foam pieces;
pictures with different number of syllables;
everyday objects like pen, pencil; eraser, etc.; syllable graphing paper;
Unifix cubes/cubes;
2 Bingo cards

Initial sounds:

1 Mirror;
circle, triangle, cards;
sound pictures beginning with the same sound;
classroom basket of objects for sound game;
card with 3 squares with a star on the top left;
3 counters/student (counters represent sounds);
pictures with cvc words;
assorted pictures from magazines /sound pictures;
1 paper bag

Final sounds, Middle sounds:

classroom basket of objects/pictures with same ending

Combination Sounds:

Pictures of words with two sounds, 3 counters;
card with three squares and a star on the left square

Alphabet:

Alphabet mat;
1 blue Upper-Case letters;
1 red Lower-Case plastic letters;
1 set of purple vowels;
3 pipe cleaners to be cut into horizontal, vertical, full & half circle, diagonal and up-down shapes;
Alphabet dice

Phonics:

1 set Sandpaper letters;
small bag for objects;
keyword and sound cards;
phonogram cards;
pictures for sounds;
foam sticks with letter names written on them

Reading:

5 sets of consonant and vowel letters;
5 sets of purple vowel letters;
pictures/objects with cvc words;
three squares card with star on the left square;
vc or cvc words written on small pieces of paper and folded

Handwriting:

Scissors;
push pins;
carpet squares;
newspaper strips;
different shape pipe cleaners;
chalk board/dry erase board;
newsprint paper/ plain paper;
chalk, crayons, dry erase markers, pencils; lined paper

Spelling:

Lined paper;
Pencil;
10 cubes;
6 rectangular colored foam pieces

Materials	Supplier
Cubes	ETA hand2mind plastic centimeter cubes
Foam pieces	S&S Worldwide AX822 EVA foam sheet assortment
Counters	Pangda 200 pieces colored plastic counters counting chips bingo markers storage bag math games (Yellow, Red)
Alphabet Mats (lower, Upper case)	ABECEDarian
Uppercase letters (Blue) Lowercase letters (Red) Vowels (lowercase) (purple)	ABECEDarian
Pipe cleaners	Acerich pipe cleaners chenille stems for DIY Art Craft decorations – 6mm x 12”
Sandpaper Letters	Lakeshore Learning

Glossary

Alphabetic Principle: It is the relationship between letters of the written language and spoken words.

Auditory Discovery: Discovery of new information is made by listening and responding to questions. E.g., discovery of a sound

Automaticity: Immediate recognition of words while decoding and comprehending what is being read.

Closed Syllable: It is a syllable that has one vowel followed by one or more consonants. The vowel in closed syllable is a 'short' sound.

Compound Word: A word that is made up of two or more smaller words that are combined to make a new word with its own meaning.

Consonant: A speech sound that is blocked by the tongue, teeth, or lips during articulation.

CVC: Consonant-Vowel-Consonant; A word that is made of a consonant, followed by a vowel and a consonant. These words are called 'closed syllables.'

Decoding: The act of translating printed word into speech.

Digraph: Two adjacent letters that represent one speech sound. It can be either two consonants or two vowels.
(e.g. ch, th, sh or ai, oa)

Dyslexia: It is a specific learning disability that is neurobiological in origin. It is characterized by difficulties with accurate and/or fluent word recognition and by poor spelling and decoding abilities. Secondary consequences may include problems in reading comprehension and reduced reading experience that can impede growth of vocabulary and background knowledge (Lyon, Shaywitz & Shaywitz, 2003).

Echo: Repeating the sound given by the teacher.

Encoding: To change spoken word into writing - spelling.

Fluency: Fluency is the ability to read a text accurately, automatically, and with prosody.

Grapheme/ phonogram: A written letter or letter cluster representing a single speech sound (e.g., t for /t/ or ch for /ch/)

Keyword: A picture of a word that represents a letter-sound association. It helps to unlock the student's memory of a speech sound and its connection to the letter which spells it. E.g. Apple /a/

Kinesthetic Memory: A voluntary motor sequence that can be recalled by students after repeated practice and training. E.g., memory of letter shapes, strokes, etc.

Letter cluster: group of letters that appear together in a single syllable. (e.g., sh, ng, igh, qu)

MSLE: stands for Multisensory Structured Language Education. This approach incorporates the simultaneous use of visual, auditory, kinesthetic, and tactile sensory modalities to link listening, speaking, reading, and writing together.

Nonsense Words: These words are usually phonetic but have no meaning. (e.g., baf) - also called nonwords, detached syllables or pseudowords.

Onset: All the sounds in a word that come before the first vowel. (e.g., in the word 'cat' - /c/ is the onset.) A word may not have an onset. (e.g., 'it, at')

Phoneme: It is the smallest unit of sound that distinguishes one word from another. (/b/ of bat vs. /c/ of cat)

Phonemic Awareness: Phonemic awareness is the ability to **hear** the sounds that make up the spoken words and an ability to manipulate sounds in words.

Phonological Awareness: Phonological awareness is the ability to identify and manipulate units of oral language.

Phonics: Phonics is the relationship between the phonemes (sounds) and the graphemes (letters) that represent these sounds.

Prosody: This involves intonation, tone, stress, and rhythm in spoken language.

Rime: The first vowel in a word and all the sounds that follow. (e.g., in the word 'bit' - /it/ is the rime.

Sight word: It is an irregular word for reading and spelling and does not require decoding to identify. It must be memorized.

Skywriting: Two fingers (pointer and middle fingers) are extended to write large letters in the air while saying the name of the letter. The hand is stretched out, fully locked, in front of the student. This develops strong muscle memory.

Sound picture: A letter or letters written within the two slanted lines (/ /) represents the sound of the letter or letters. (e.g., /t/ or /map/)

Spelling Rules: these are principles guiding spelling. (e.g., c before a, o, u and k before i, e)

Syllables: They are units of sound said with one push of a breath. Each syllable has one vowel sound.

Unvoiced Sound: A speech sound that is made without vibration or buzzing of the vocal cord. Some consonants are unvoiced.

Voiced Sound: A speech sound that is made with vibration or buzzing of the vocal cords. All vowels and some consonants are voiced.

Vowel: A speech sound that is unblocked by the teeth, tongue, or lips. Vowels are voiced i.e., the vocal cords vibrate/buzz.
(a, e, i, o, u)
